### Myths
- Oppressed and Oppressors | Winners and Losers | Good and Evil

---

Why the Power and Fuel to keep the status quo comes from the oppressor or the ones that want to "join" the oppressor.

Emerging movements in the oppressor often come from privilege, the luxury of not living in the base of the Maslow Pyramid.

Emerging movements on the side of the oppressed often come from the need to adapt, survive.

Globalization makes it so all of these realities co-exist everywhere. World views, systems and litanies are all products of these connections.

OPPRESSOR experiences "success" and creates means of sustaining power.

OPPRESSED already experiencing failure, drivers for change and adaptation.
