**Prof Dr. Andree Woodcock**

[adx974@coventry.ac.uk](mailto:adx974@coventry.ac.uk)

**Dr Andree Woodcock** has a BSc in Psychology and Social Biology with an MSc in Ergonomics from UCL. My PhD concerned an investigation of the use of ergonomics in automotive concept design acquired from Loughborough University while I was a Daphne Jackson Research Fellow. Most of my research has been located within design departments, looking at applying user-centred design to wicked problems in the areas of health, education, regeneration and transportation.

**Dr. Deana McDonagh**

[mcdonagh@illinois.edu](mailto:mcdonagh@illinois.edu)

**Dr Deana McDonagh** is Professor of Industrial Design in the School of Art + Design at the University of Illinois (Urbana-Champaign) and faculty at the Beckman Institute of Advanced Science and Technology. She is an experienced design practitioner and entrepreneur. Prior to joining the University of Illinois she was a Reader in User-Centred Design at Loughborough University in the UK. She is a Research Fellow at Coventry University (UK), Adjunct Professor at Northwestern University and Director of Research and Insight for Herbst Produkt design consultancy (USA).

**Komal Faiz**

**Komal Faiz** is a design researcher, an impact analyst, and founder at DesignPak, and has been nominated as a global shaper by the World Economic Forum (WEF). She did her Masters in Strategic Foresight & Innovation from OCAD University, Canada and Bachelors in Visual Communication design from NCA. She has worked with both Pakistani and Canadian organization such as the Canadian Ministry of Children and Youth Services, MaRS Discovery District, University of Toronto, in Canada and Women Empowerment Group, US Consulate General and others in Pakistan.

**Punnal Faiz**

**Punnal Faiz** Director at DesignPak is a multi talented person with various skill. He is an architect and a self taught Visual Communication Designer. He has done his bachelors from National College of Arts, Lahore and has been into teaching and practicing architecture since then. He is a former Lecturer at University of Lahore at School of Architecture. An entrepreneur currently working on various ideas at DesignPak. He is a member of PCATP (Pakistan Council of Architecture & Town Planning) and also a member of GBC (Pakistan Green Building Council).

**Dr. Nikmatul  
Adha Nordin**

[nikmatul@um.edu.my](mailto:nikmatul@um.edu.my)

**Nikmatul Adha Nordin** is the Head of Department of Urban and Regional Planning in University of Malaya. She obtained her first and second degree from Universiti Sains Malaysia in the field of Urban and Regional Planning. She was awarded with a doctoral degree from USM in 2011 in the field of social and physical planning. Her research interest is on participatory urban planning, tourism planning and community development and has published several publications on the subjects.

**Dr. Yong Adilah  
Hurumain**

[adilah\\_shamsul  
@um.edu.my](mailto:adilah_shamsul@um.edu.my)

**Dr. Yong Adilah** is a lecturer from Faculty of Built Environment, University of Malaya, Malaysia. She did her Ph.D. in Innovation Systems Engineering in Utsunomiya University Japan. Her research works involve transportation planning, women mobility, and urban design.

**WEMOBILE is an exploration of the struggles women undertake in their mobility in LMICs. Partners in Pakistan, Malaysia and the UK have come together to pool these stories and experiences to understand their problems and how they are currently being addressed.**

# Our Project aims

1

*to understand, using Empathic Design methods, the mobility barriers faced by women in Malaysia and Pakistan.*

2

*to Co-Design culturally sensitive solutions, policies and strategies to address these problems.*

3

*to consider the usefulness of EU sustainable urban mobility planning processes in increasing consultation and user engagement in the design of master plans*

4

*to raise awareness of the effects of inaccessible transport on women and sustainable cities and communities*

# What is mobility?

# Approach & background

Women in Low-Medium Income Countries (LMICs) face countless **cultural, social, and economic barriers** that inhibit their freedom of movement.

**The lack of safe, secure and stress-free mobility**

**Steps are being taken** to address some of these problems, e.g:

- through women-only transports,
- campaigns for zero tolerance of harassment
- addressing the need to take the views of women (and other marginalised groups) in transport planning seriously.

While this is a start, it is far from enough...

# Pakistan demographics

# Pakistan demographics

6th Population Housing Census in 2017- 19 years delay

Population: 207.7 million,

- 106 million (51%) are men,
- 101 million (49%) are women, and
- 10,418 are transgender persons.

**More males than females.**

There are approximately 1 million more men than women in Punjab (province).

National Assembly:

- 71 (21%) women
- 271 (79%) men

# Pakistan

Literacy Rates (LRs) - Punjab - remained at 63% in 2016.

- male LR increased from 71% to **72%**
- female LR declined from 55% to **54%**.

Vehicles:

- 1,649,044 vehicles owned in 2017,
- 1% of vehicles were owned by women
- 99% were owned by men.

Licences:

- 5.2% of licences issued to women,
- only **1%** of women had a vehicle registered in their name

# Safety conditions in Pakistan

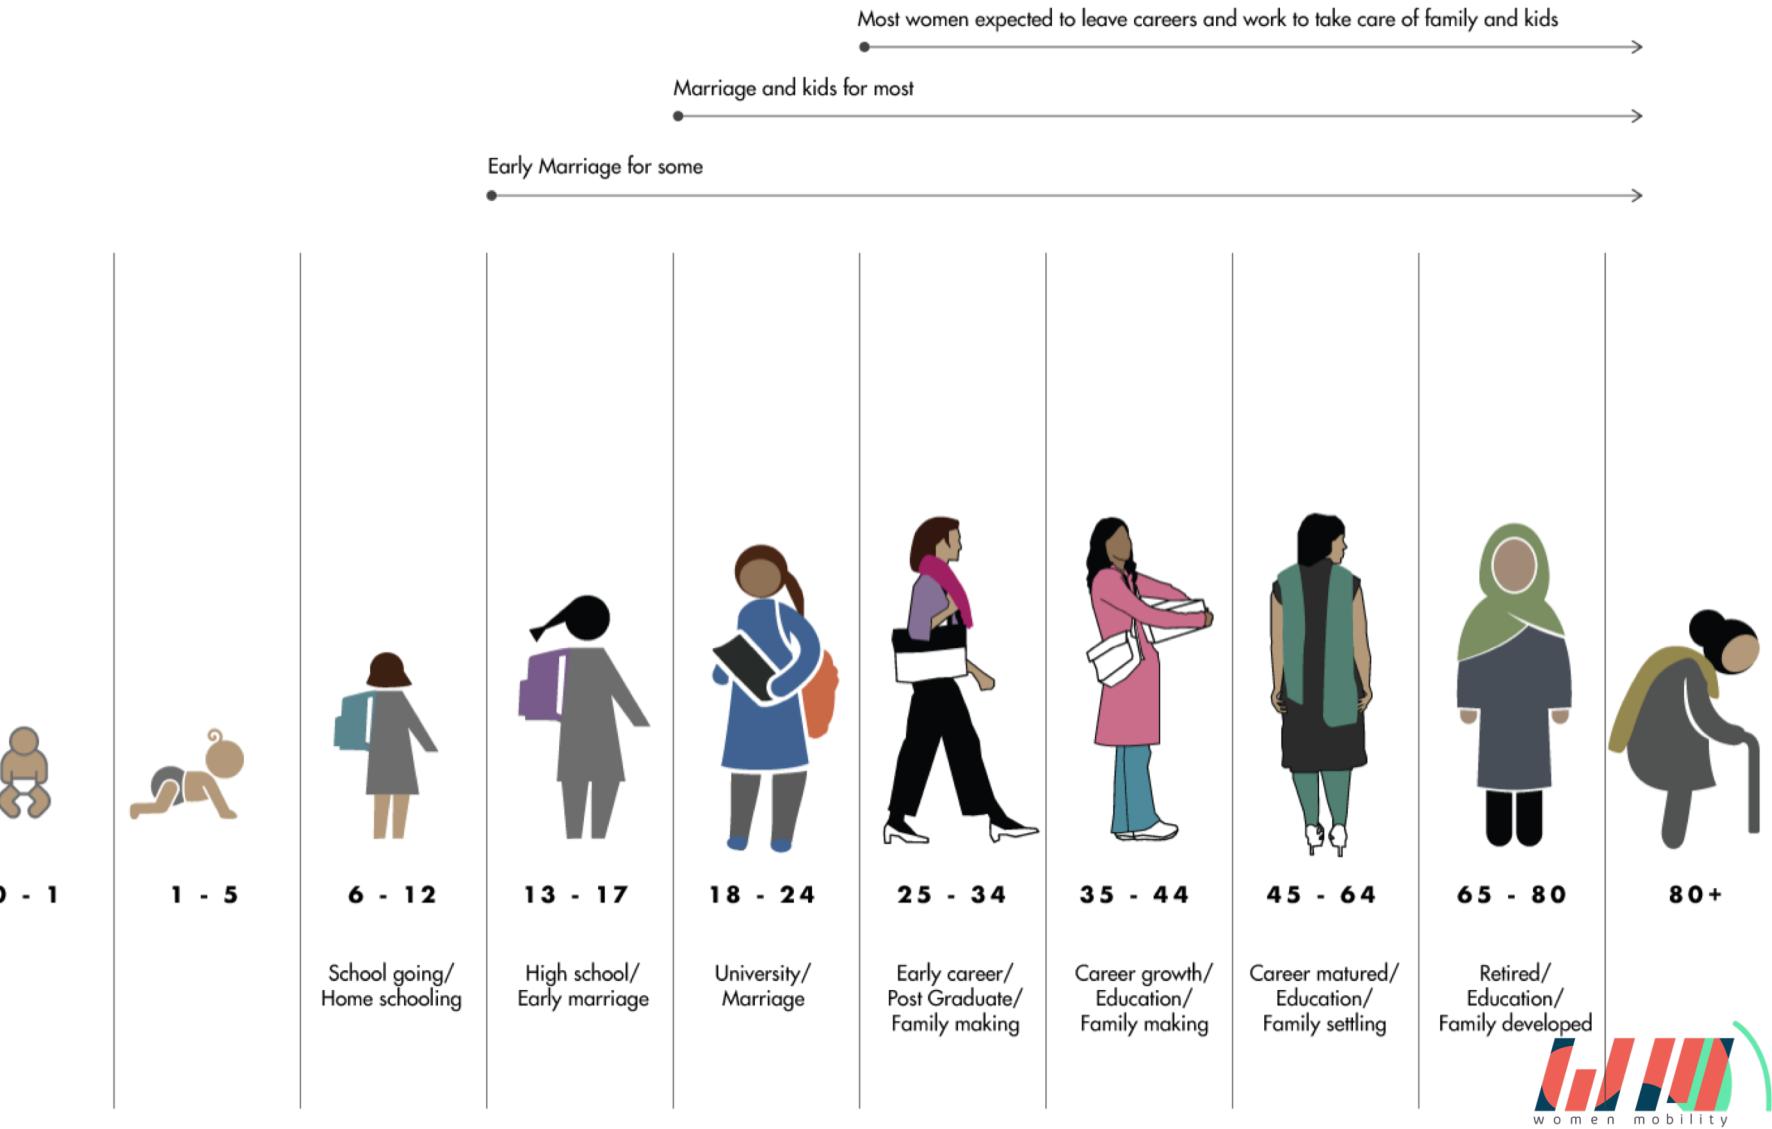

## Crime against women:

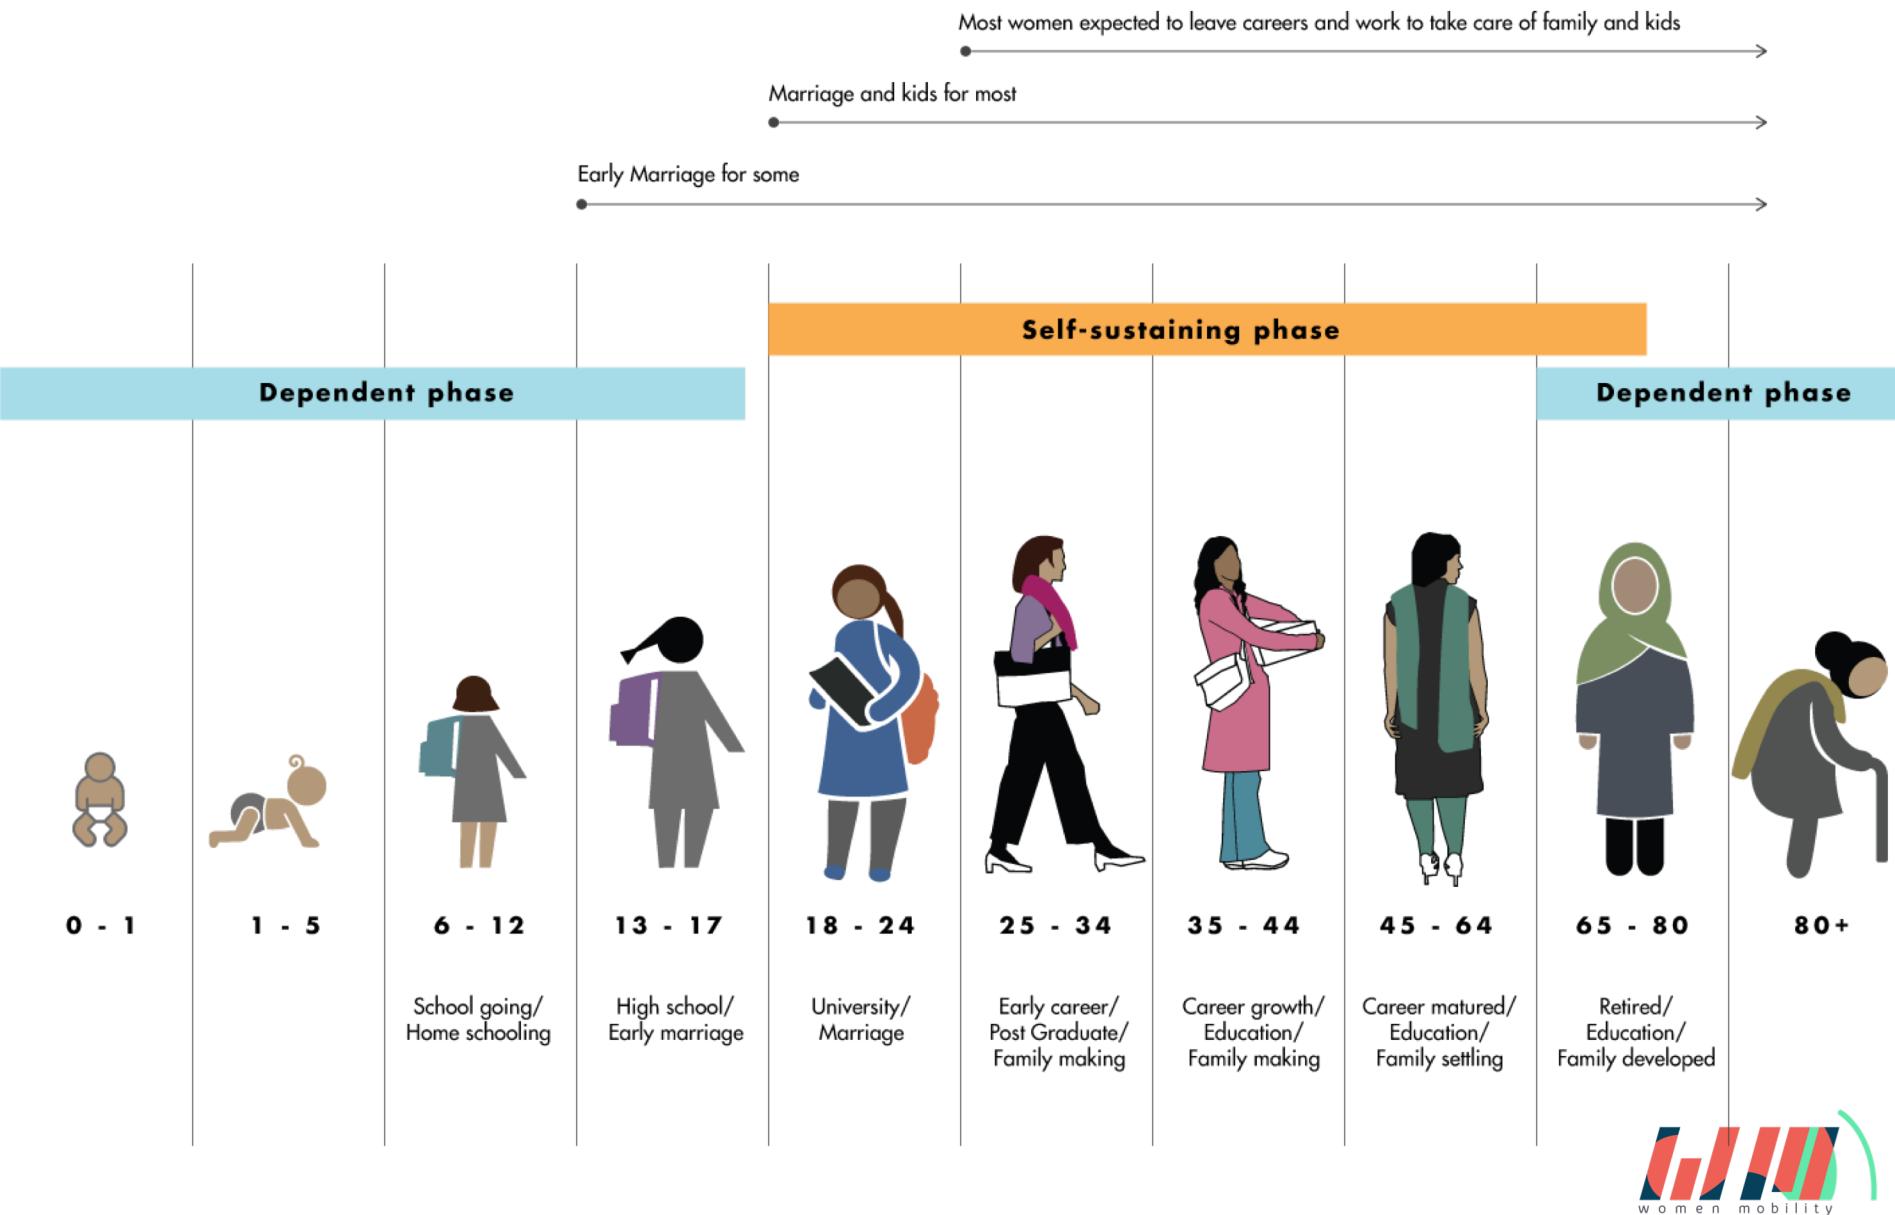

- Kidnappings in the greater Punjab region increased from 1,054 in 2016 to 3,231 in 2017.
- 150 rape cases were reported in Punjab in 2015
- **6 women are kidnapped and 4 are raped every day in Pakistan**

2017- Punjab Safe City Authority and Lahore Government installed approximately **8,000 surveillance cameras** under the phased Punjab “**Safe City**” Project. The system features a 24-hour command center where police officials monitor various areas of the city, looking for criminal or terrorist activities.

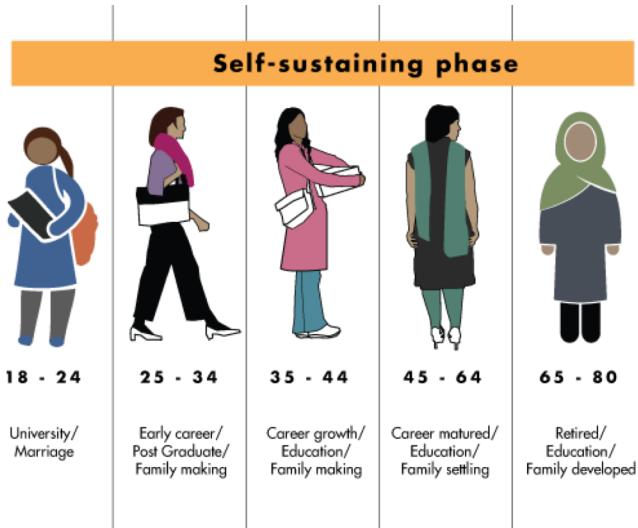

# 10 stages of women- pakistan

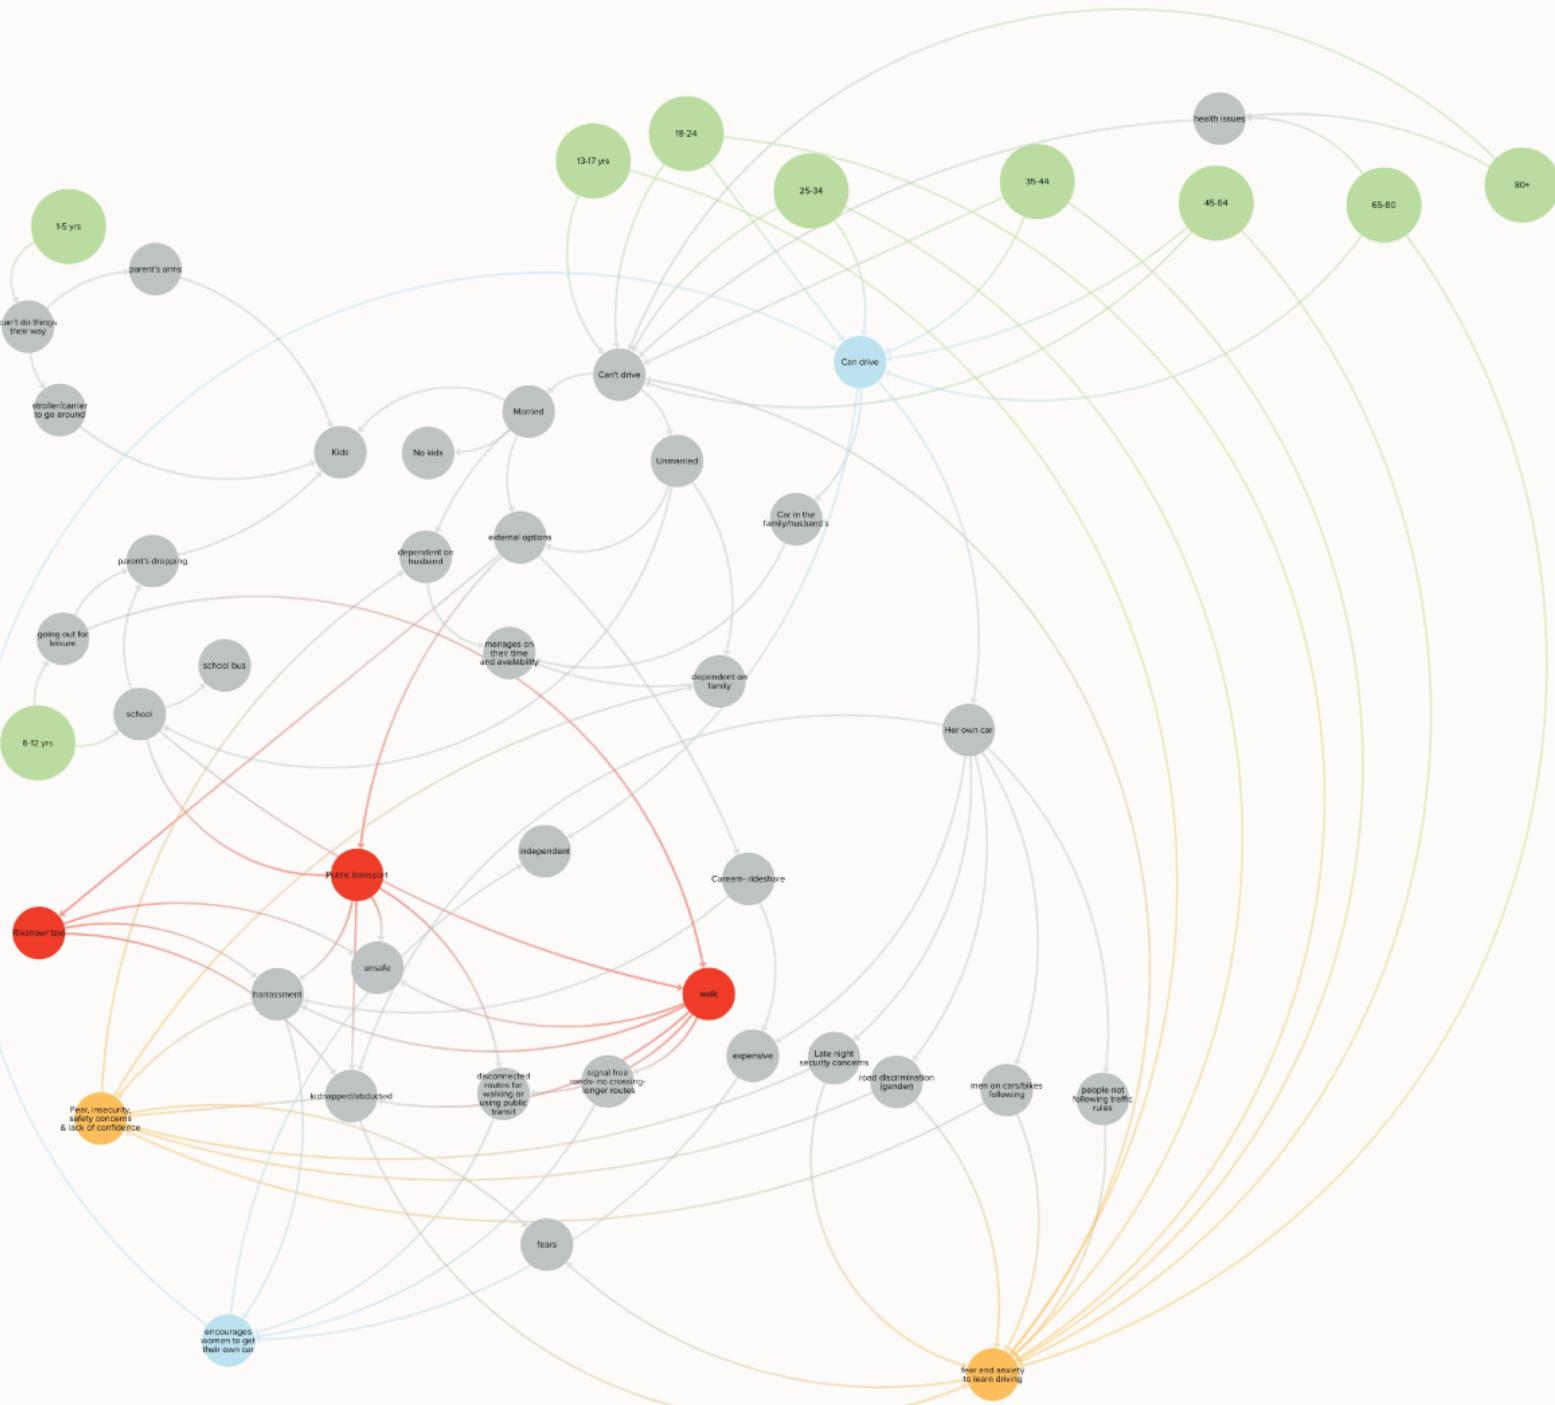

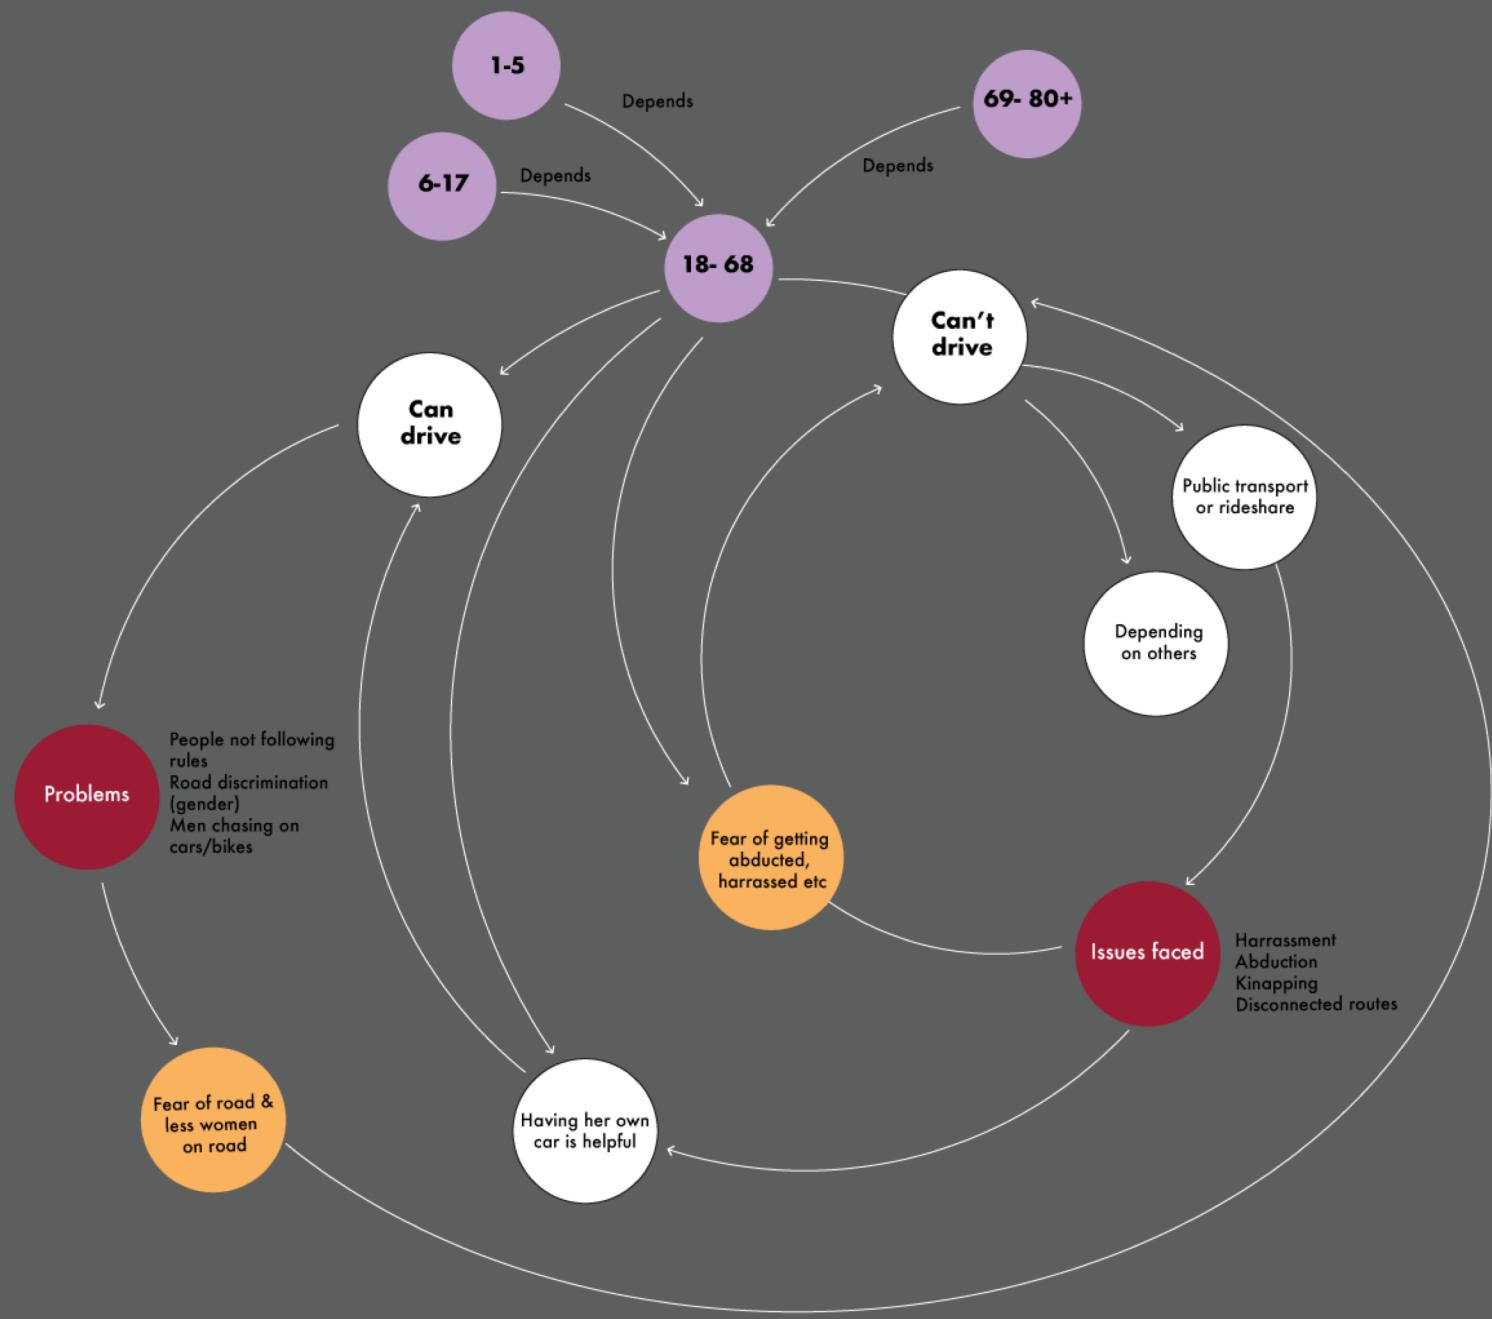

# Phases of Journey

	Pre-departure Planning phase	Journey	Arrival/ Plan for return	Return and Arrival
Options/ Process	What options available? Depending on whom? Money? Time consuming & limiting	Stress and anxiety because of on road barriers. Constant feeling of insecurity and fear	Late night stay difficult/impossible. Time dependent mobility. What options available? Needs pre-planning	Constant stress, fear and anxiety. At your own risk. Lack of support if technical problems with car
Barriers	<p><b>Public transport, Rikshaws:</b> Fear, insecurity, unavailability, unreliable</p> <p><b>Walking:</b> Fear, disconnected routes, no walkways, signal free roads without pedestrian crossing</p> <p><b>Family Car:</b> Dependence, availability</p> <p><b>Own Car:</b> Expense, which route safer</p>	<p><b>Public transport, Rikshaws:</b> Unsafe, risk of kidnapping, abduction, harassment, fear</p> <p><b>Walking:</b> Kidnapping, harassment, abduction, accidents</p> <p><b>Car:</b> Road discrimination, men chasing on bikes/cars, people not following traffic rules</p>	<p><b>Public transport, Rikshaws:</b> No waiting areas, fear, insecurity, unavailability, unreliable</p> <p><b>Walking:</b> Fear, disconnected routes, no walkways, signal free roads without pedestrian crossing</p> <p><b>Car:</b> Late night stay difficult because unsafe.</p> <p><b>Careem:</b> unsafe</p>	<p><b>Public transport, Rikshaws:</b> Unsafe, risk of kidnapping, abduction, harassment, fear</p> <p><b>Walking:</b> Kidnapping, harassment, abduction, accidents</p> <p><b>Car:</b> Road discrimination, men chasing on bikes/cars, people not following traffic rules, cars stopped</p>
Leverage points	<p><b>Careem:</b> Available, relatively safer option</p> <p><b>Own car:</b> less dependence, safer</p>	<p><b>Careem:</b> Available, relatively safer option, efficient</p> <p><b>Own car:</b> Safer, efficient</p> <p>Safety helplines (esp in Punjab)</p>	<p><b>Own car:</b> Safer, efficient</p>	<p>Safety helplines (especially in Punjab)</p>
