# The Democracy Design Compass

Analysis of three master courses  
Systems-oriented design: 2016 – 2017 – 2018  
Design for democracy

## **RELATING SYSTEMS THINKING AND DESIGN THINKING**

RSD 8 17. – 19. October 2019.

Kaplan Institute, home of IIT Institute of Design (ID), Chicago (IL), US.

Linda Blaasvær – The Norwegian Labour and Welfare Administration (NAV)

Birger Sevaldson – The Oslo School of Architecture and Design (AHO)

*What is design for democracy?*

# What is Design for democracy?

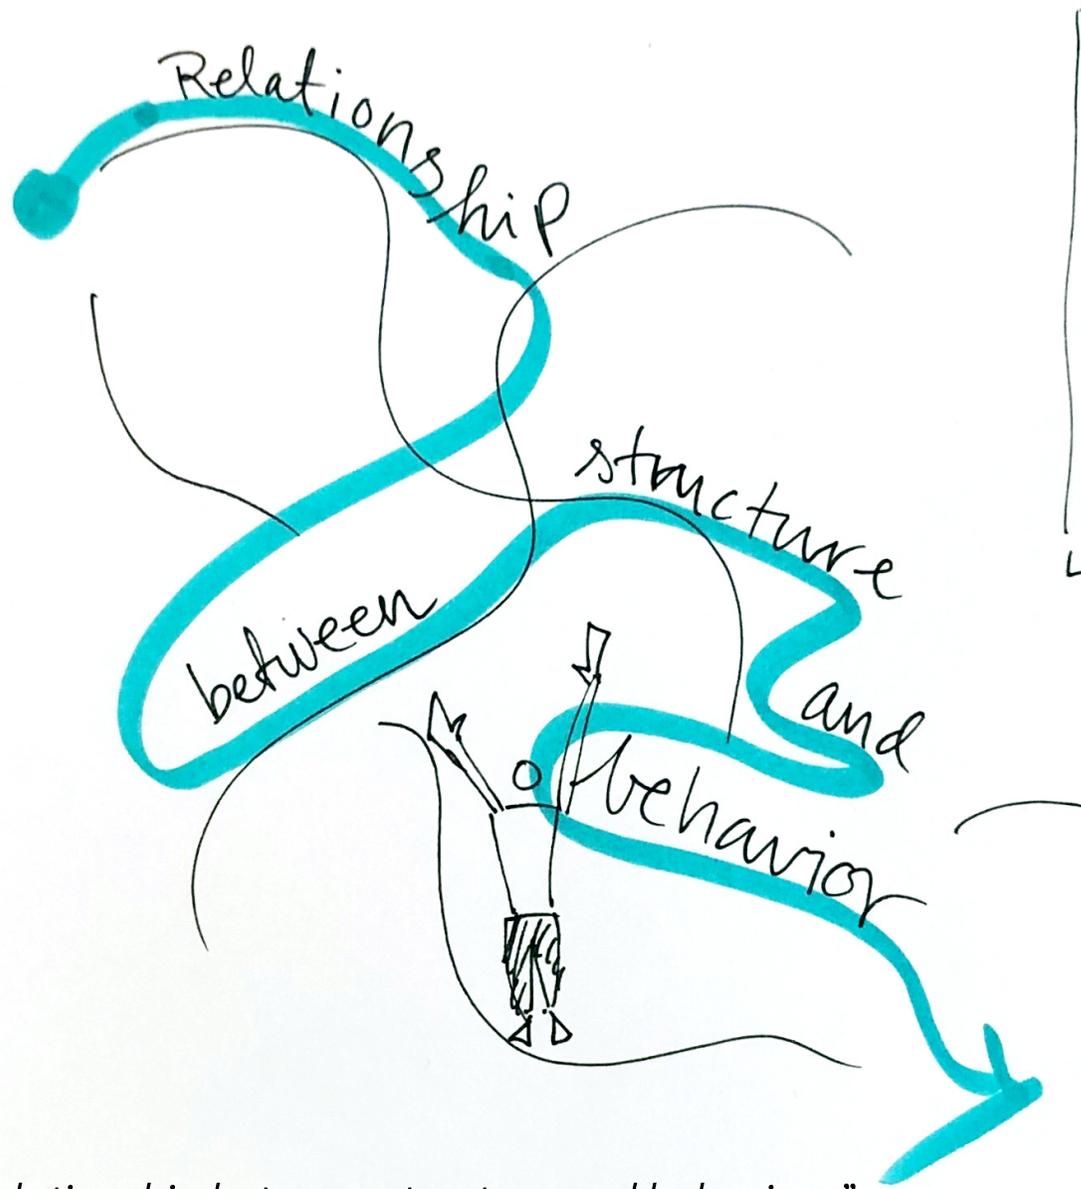

When planning the course important questions arose, such as:

**Can we through design, envision and describe a future that supports a balanced distribution of power, values and resources?**

**Can we contribute to building democratic cultures and lowering the threshold for participation in democratic processes?**

**Can we design processes that make it easier to think long-term and through this encourage sustainable development?**

**Can we, through the design of our surroundings help the emergence of democratic organisations?**

Systems can be seen as the “*relationship between structure and behaviour*”

- Donella Meadows

# Design for democracy 2016 - 2018

Three sub categories

2016: **Participative democracy** in urban planning with a municipality in Norway

2017: **Workplace democracy** with UDI – the Norwegian Directorate of Immigration, and **representative democracy** in collaboration with Norway's largest insurance company

2018: How to **engage young people** to vote - in collaboration with a newspaper

UDI

Gjensidige 

DN

AHO

# Facilitating the course

Design for democracy within the context of systems-oriented design

Introduction to Systems-oriented design

The students were given an open brief, a main theme and a direction

Introduction to democracy through lectures and a reading circle

The democracy files

**We do not have to share exactly the same idea of what democracy is:**

to defend it as a core value, it is enough to recognize the strong convergence between democracy and design in four respects:

**design OF democracy** – *improving democratic processes* and the *institutions* on which democracy is build

**design FOR democracy** – *enabling more people to participate* in the democratic process, especially through the use of *technology*

**design IN democracy** – building *access, openness and transparency* into institutions in ways that assure *equality and justice*

**design AS democracy** – the *practice of participatory design* so that *diverse actors* can shape our present and future worlds in *fair and inclusive* ways.

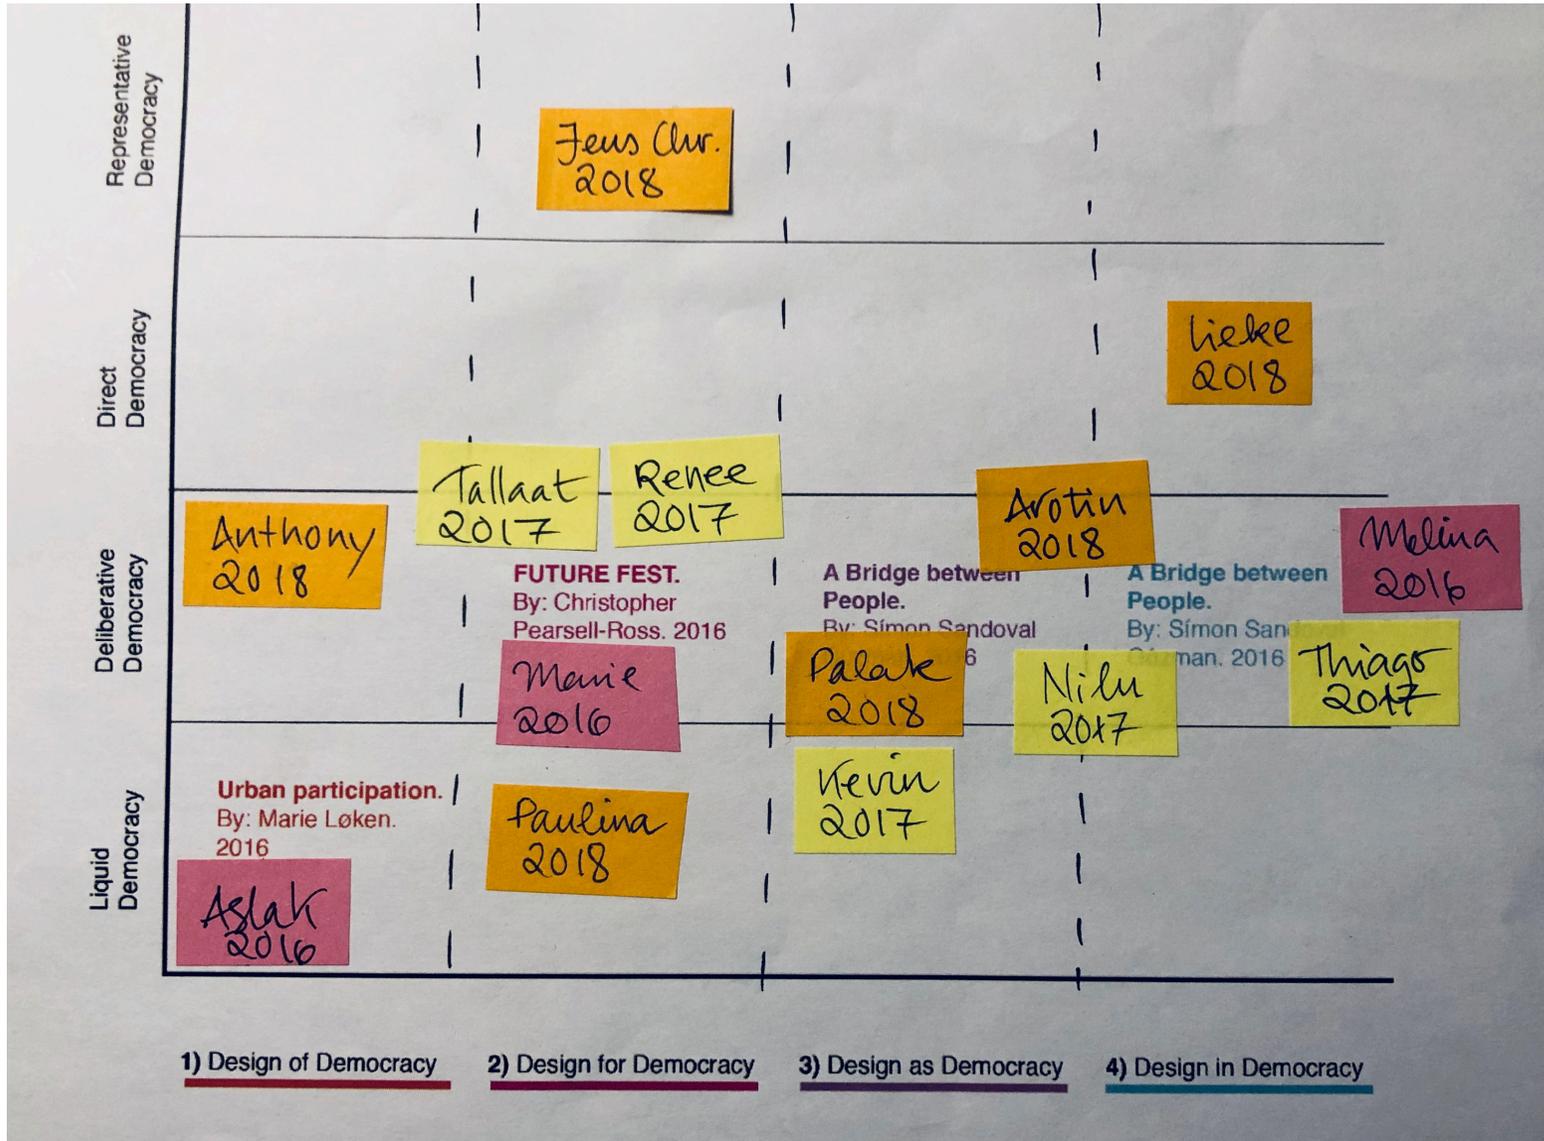

Chicago, 5. March 2017,  
Enzio Mazini and Victor Margolin

# Empirical data

The portfolio of projects for this study includes 19 master's projects of a duration of a full semester.

# Analysing the democracy projects

# Theory

.

.

**4 types of democracy**

**4 modes of design for democracy by Manzini and Margolin**

# Types of democracy

## **Representative democracy** –

Representatives represent us in a dialog going on in a parliament or similar. A form of indirect democracy. Levels spanning from municipalities, regions, to nations and federations like EU.

## **Direct democracy** –

Issues are voted on directly

## **Deliberate democracy** –

Sometimes called dialogic democracy. Participatory processes in society.  
- spanning from hearings to involving all parts of the (organized) civic society.

## **Liquid democracy** –

Digital media, big data, and networks allow new forms of democracy to emerge. Combines direct influence with representation.

**We do not have to share exactly the same idea of what democracy is:**

to defend it as a core value, it is enough to recognize the strong convergence between democracy and design in four respects:

**design OF democracy** – *improving democratic processes* and the *institutions* on which democracy is build

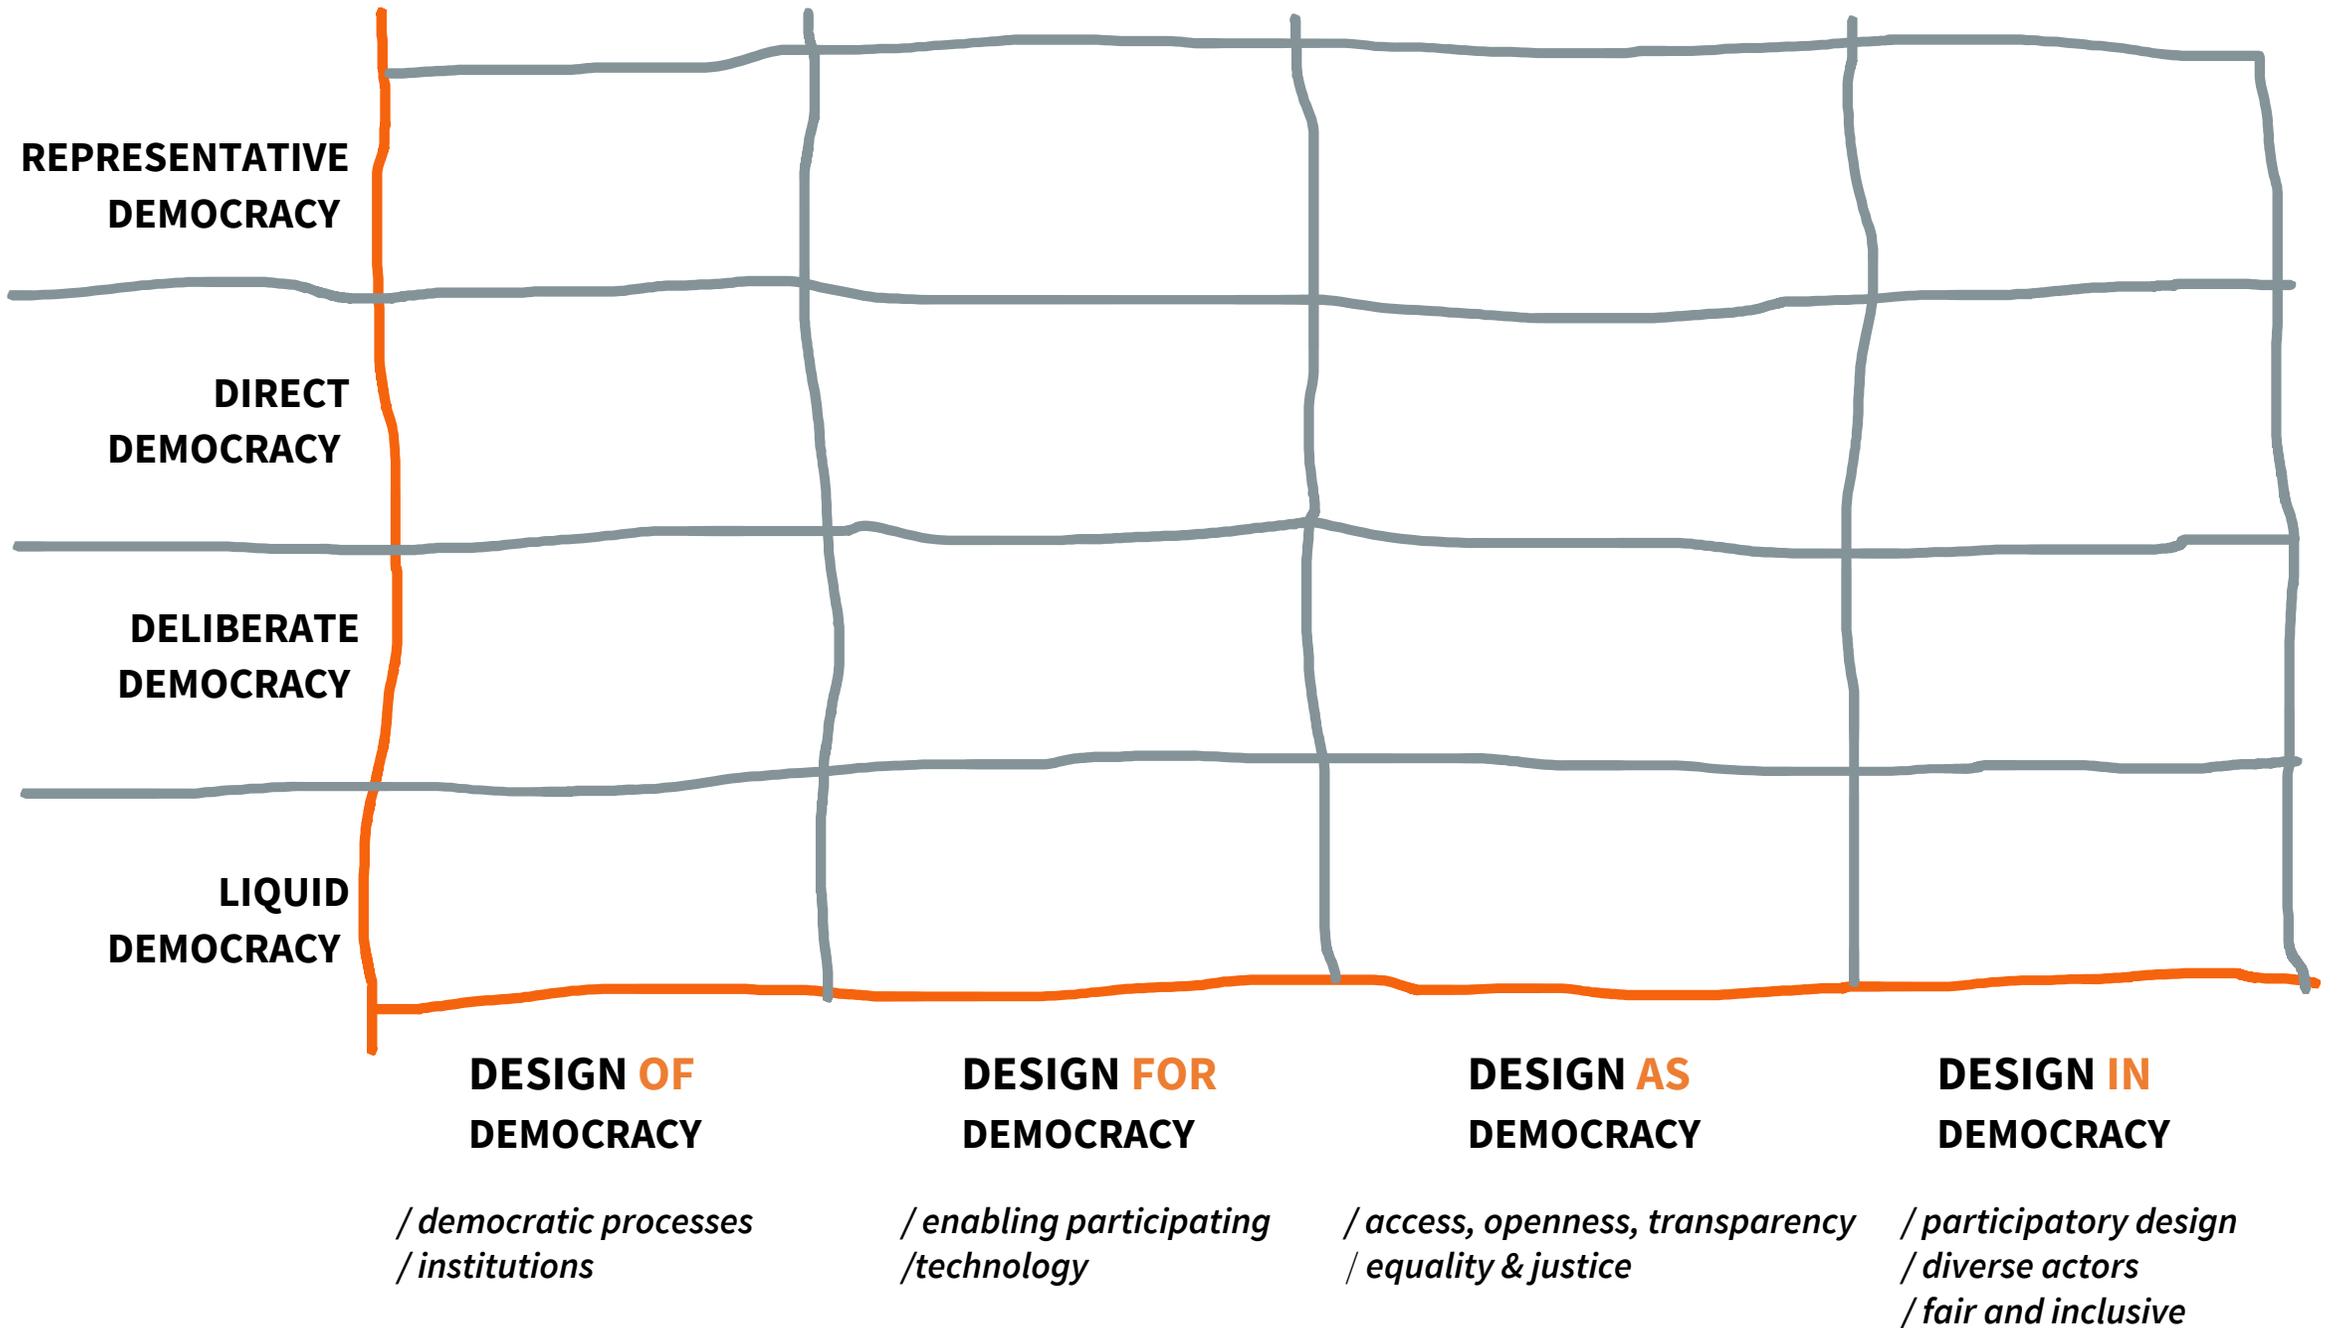

**design FOR democracy** – *enabling more people to participate* in the democratic process, especially through the use of *technology*

**design IN democracy** – building *access, openness and transparency* into institutions in ways that assure *equality and justice*

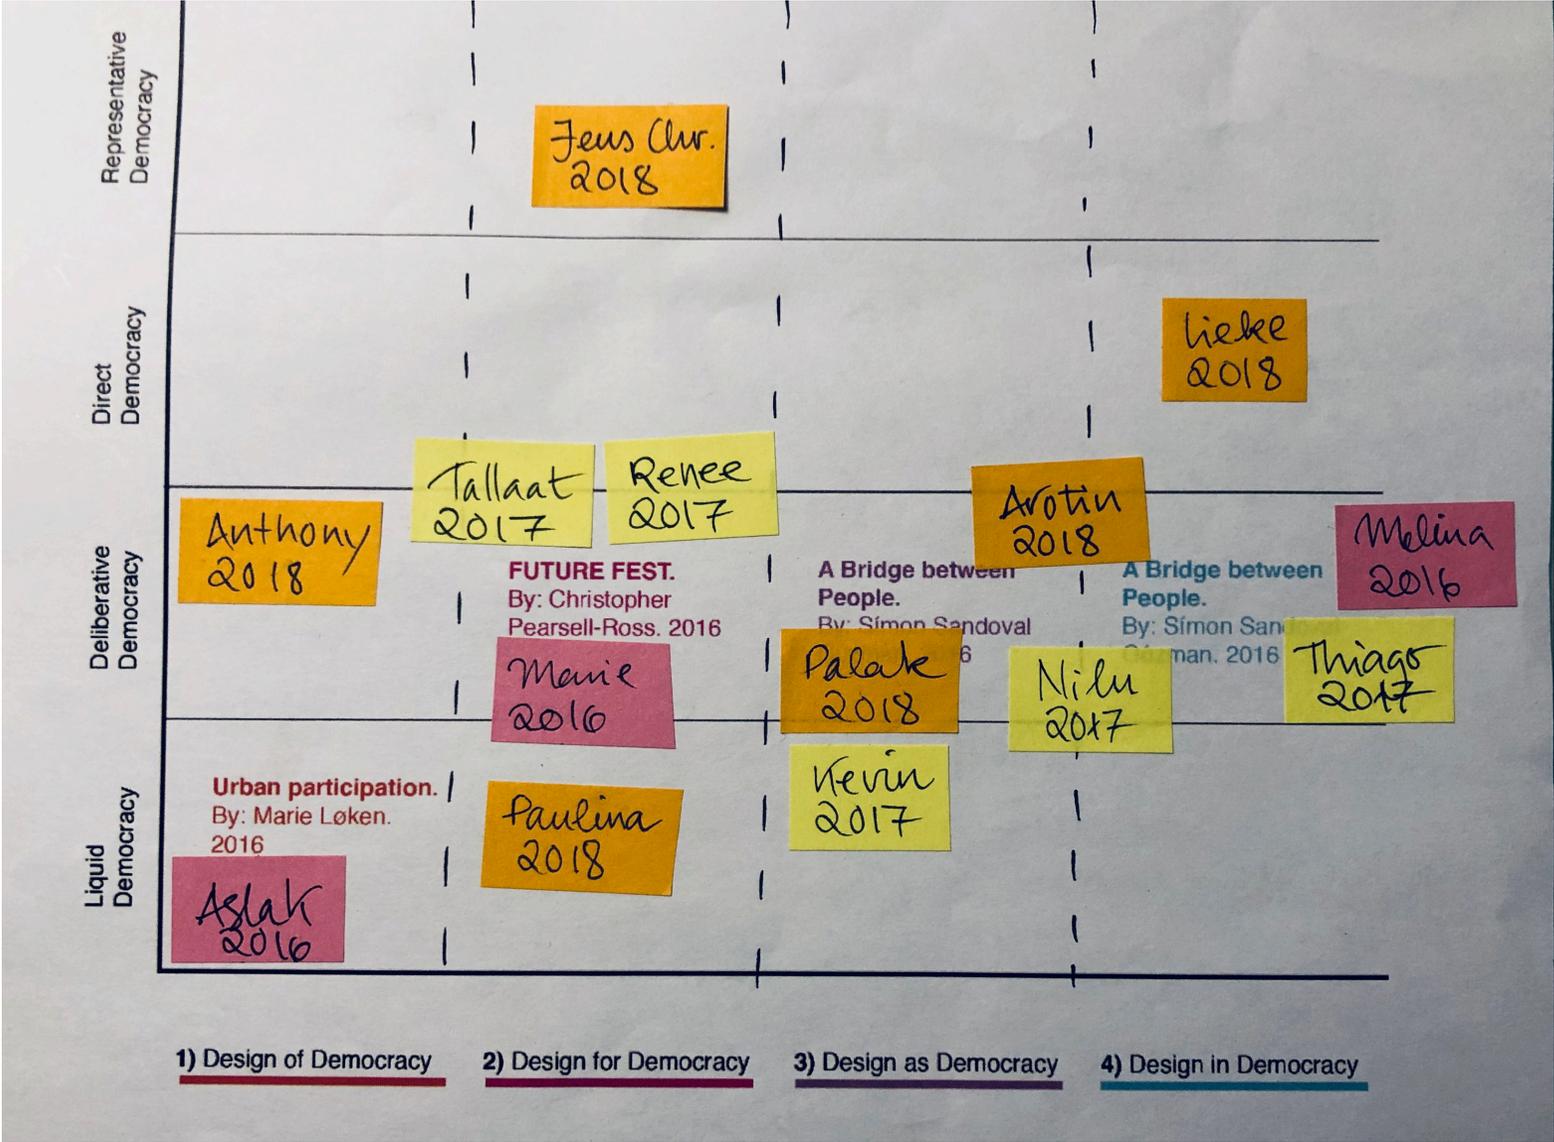

**design AS democracy** – the *practice of participatory design* so that *diverse actors* can shape our present and future worlds in *fair and inclusive* ways.
