

using the equity model:

step one

Evaluate each **QUALITATIVE PRINCIPLE** using the detailed metric of **HUMANISTIC SCALES**

the degrees for evaluation represent a threshold, a level cannot be skipped if not met

step two

Once the four concepts are evaluated, analyze the modeled place equity according to the **OUTCOME EVALUATION**

complete a link based highest equivalent point, refer to definitions section

's

(place of experience)

EQUITY MODEL

evaluation scale

- exclusive
- extrinsic
- inclusive
- intrinsic

method

incorrect

correct

evaluated Equity of Place: (outcome)

Outcome evaluation

What degree of equity have you analyzed?

0  no possible linkage:
disparity in quality of life

1  lowest link:
challenging liveability

2  second-level link:
sufficiently human-centric

3  thrid-level link:
equitable Environment

4  highest link:
place of value

Quality  Availability of experiential **meaning and value**

Flourishing  Viable conditions for a positive state of mental **well-being** and health

Design  Built-form and the environment's consistency to **express visual and physical engagement**

Resilience  **Stability and strengthening** as the environment matures, in opposition to **uncertainty in change**

Qualitative Principles

1 **Intrinsic (I/Me)**  *Stability and positive consistency for achieving **basic needs**, functions, and connections*

2 **Inclusive (Us/We)**  *Opportunity to fulfill a sense of individual **belonging**, and become part of a social-fabric*

3 **Extrinsic (Here)**  *Potential for spatial-fabric and choreogrphay of the **environment** to become a **valued** component of one's **lifestyle***

4 **Exclusive (Our)**  *Form and infrastructure boast a capacity to build communal **esteem**, expressing a strong identity of **humanistic-character***

Humanistic Scales of Measure
