Crimes Against Nature: The Banality of Ethics in the Anthropocene

at 17 JULY 2015 medium OPINION in ANTHROPOCENE, PHILOSOPHY

Among the great crimes of the twentieth century, the most enduring will surely prove to be human disruption of the Earth’s climate.

The effects of human-induced climate change are apparent now and will become severe this century, but the warming is expected to last thousands of years. That is so because extra carbon dioxide persists in the atmosphere for a very long time, but also because changes in the climate are triggering changes in the Earth System as a whole – changes that cannot be undone.

If it is a crime to transform the Earth into a hot and less habitable place, what are the offences committed by those responsible? A panel of eminent jurists this year published some principles to guide us. The *Oslo Principles* note that “all States and enterprises have an immediate moral and legal duty to prevent the deleterious effects of climate change.”

Flourishing – Is this too audacious?

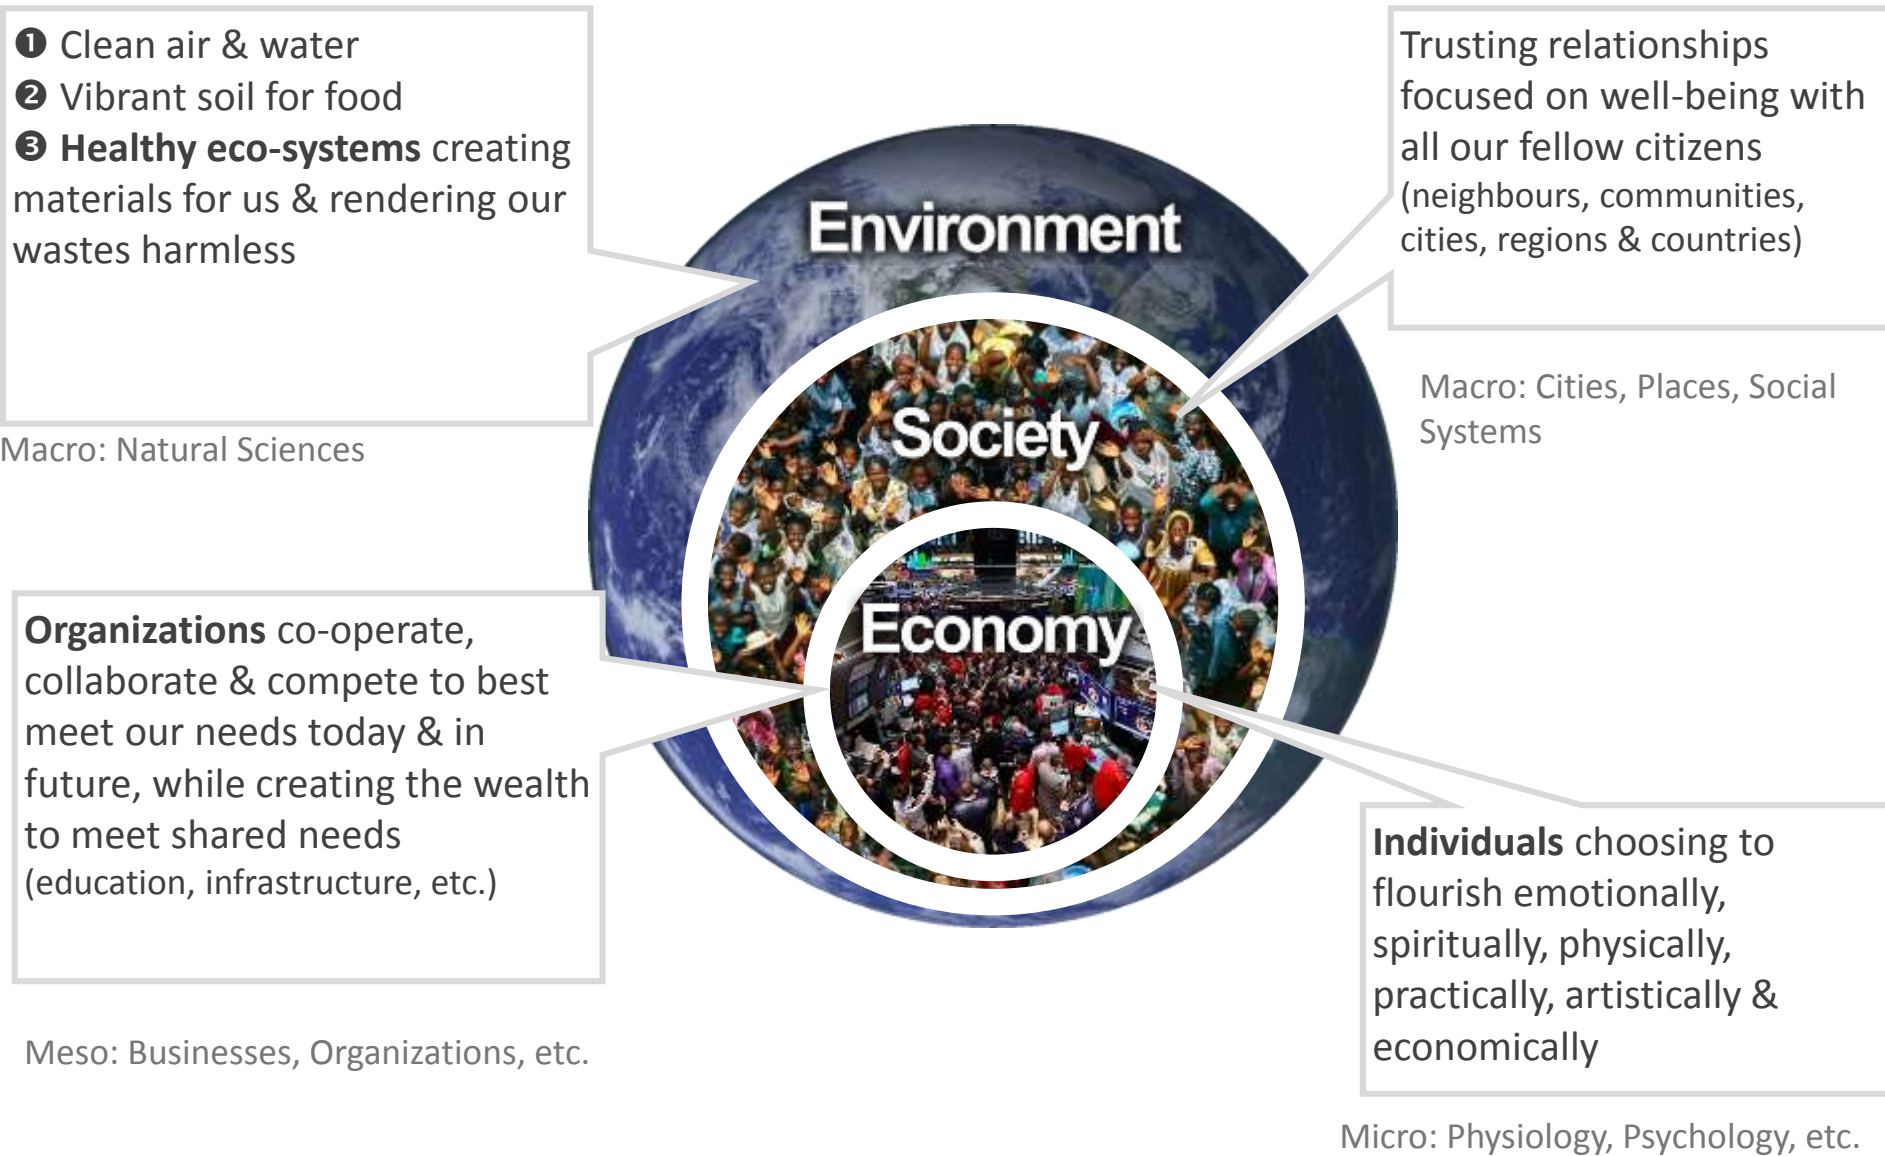

What do we want from sustainability?
“The *possibility* that human & other life
will flourish on this planet forever”

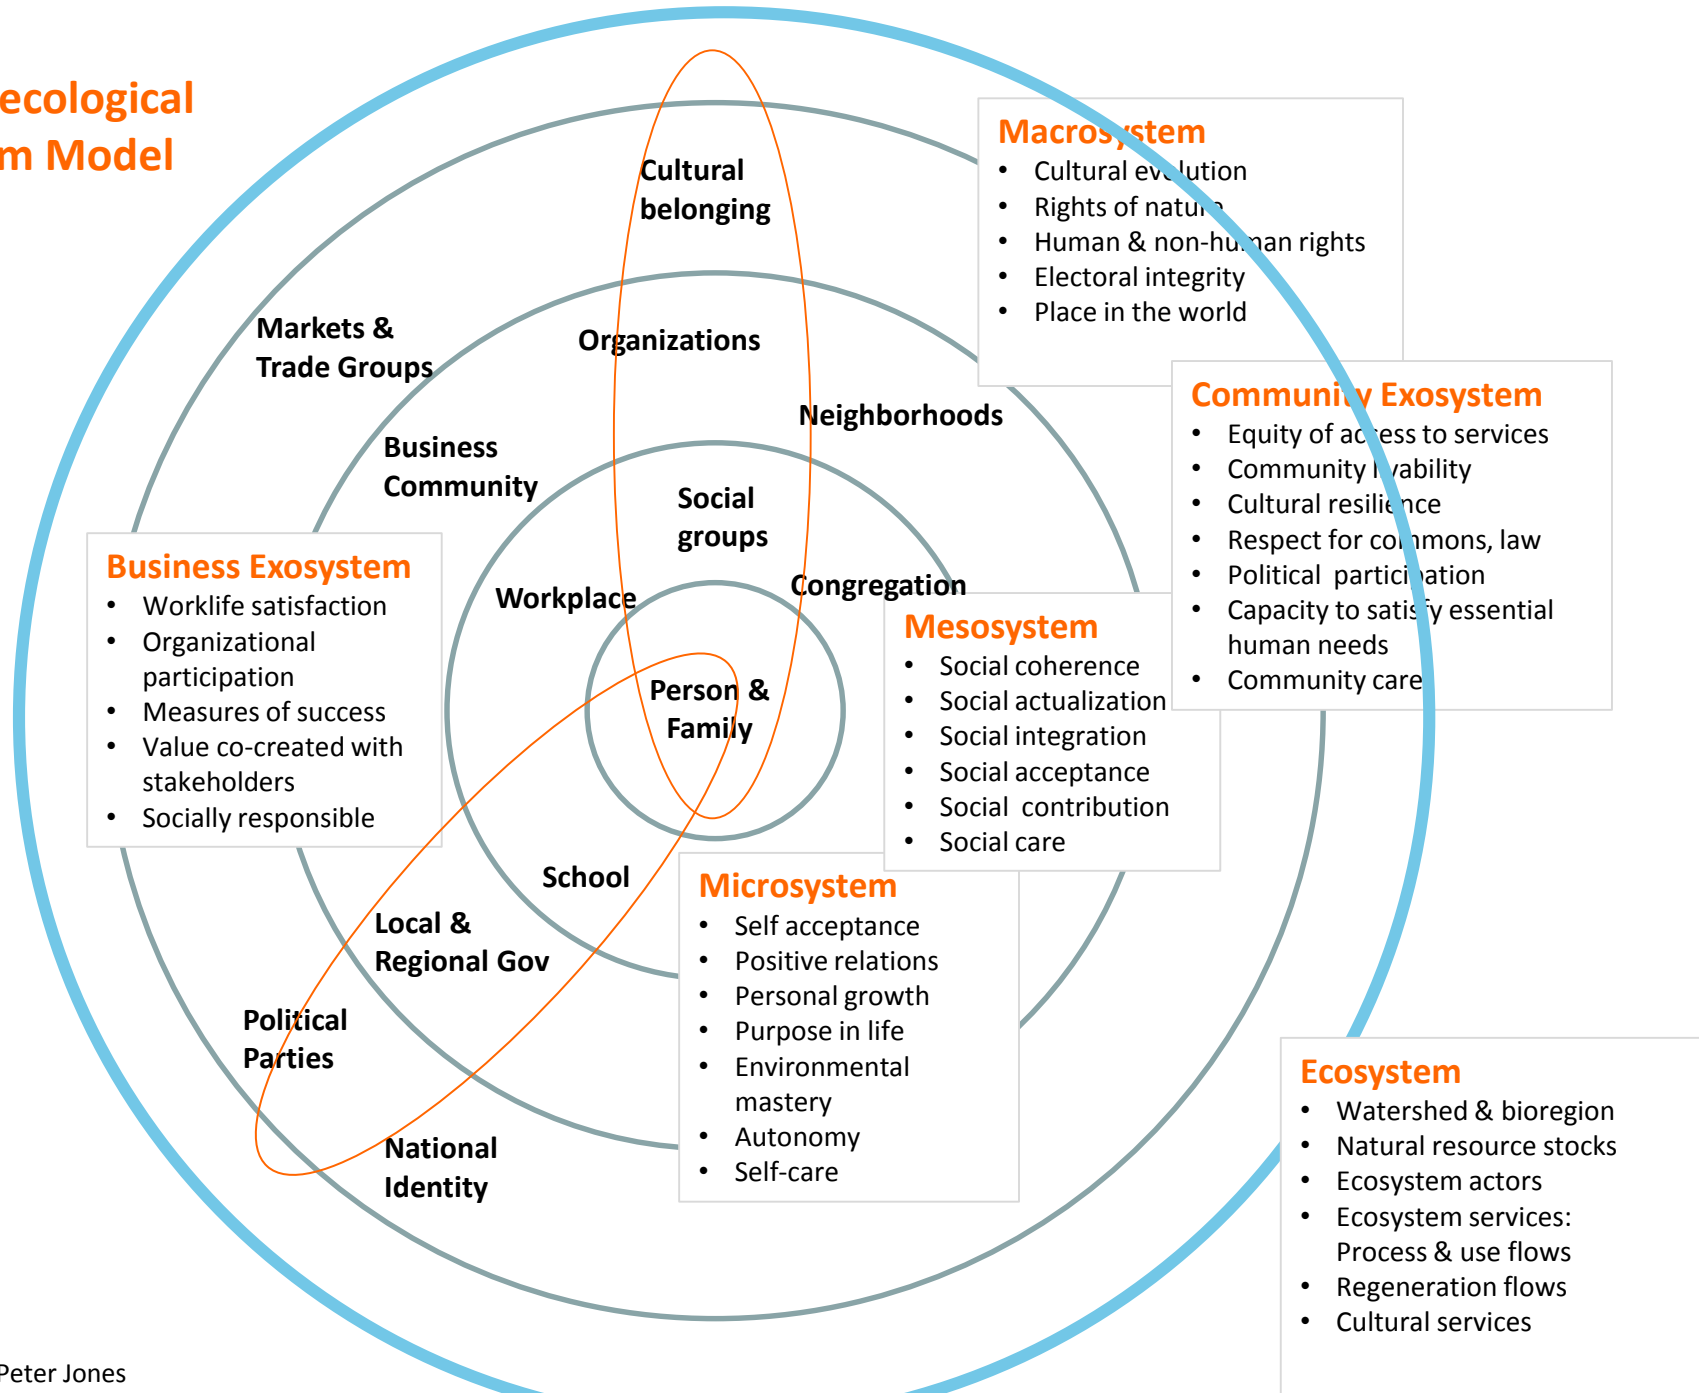

John Ehrenfeld, MIT

Business Model Canvas – the Language of Profit Prioritizing Business

*From “The business model canvas – why and how organizations around the world adopt it – a Field Report”

<http://blog.strategyzer.com/posts/2015/2/9/why-and-how-organizations-around-the-world-apply-the-business-model-canvas>

“A business model is a description of how an organization defines and achieves success over time.”

Emerging mode of co-creative planning & design

- Adapting business design artifacts toward flourishing outcomes
- Consistent with systems & social thinkers (Ulrich, Law, Beck, Giddens, Ozbekhan)
- Every stakeholder has perspective, values, relations
And opportunity to contribute to *evolutionary design*
- Creates “tri-impact” by being *tri-profitable*
 - Financially rewarding
 - Socially beneficial
 - Environmentally regenerative

Flourishing Business CanvasSM

- A common language to collaboratively sketch, prototype, design, share, measure, diagnose & tell stories about a flourishing business model
- Based on 3 years of graduate research + 3 years of practice community R&D.
- Ontology & visual canvas – Extending Osterwalder's successful Business Model Canvas & PhD

Abstract

Business is increasingly employing sustainability practices, aiming to improve environmental and social responsibility while maintaining and improving profitability. For many organizations, profit-oriented business models are a major constraint impeding progress in sustainability. A formally defined ontology, a model definition, for profit-oriented business models has been employed globally for several years. However, no

Three Contexts for Business – And Societies?

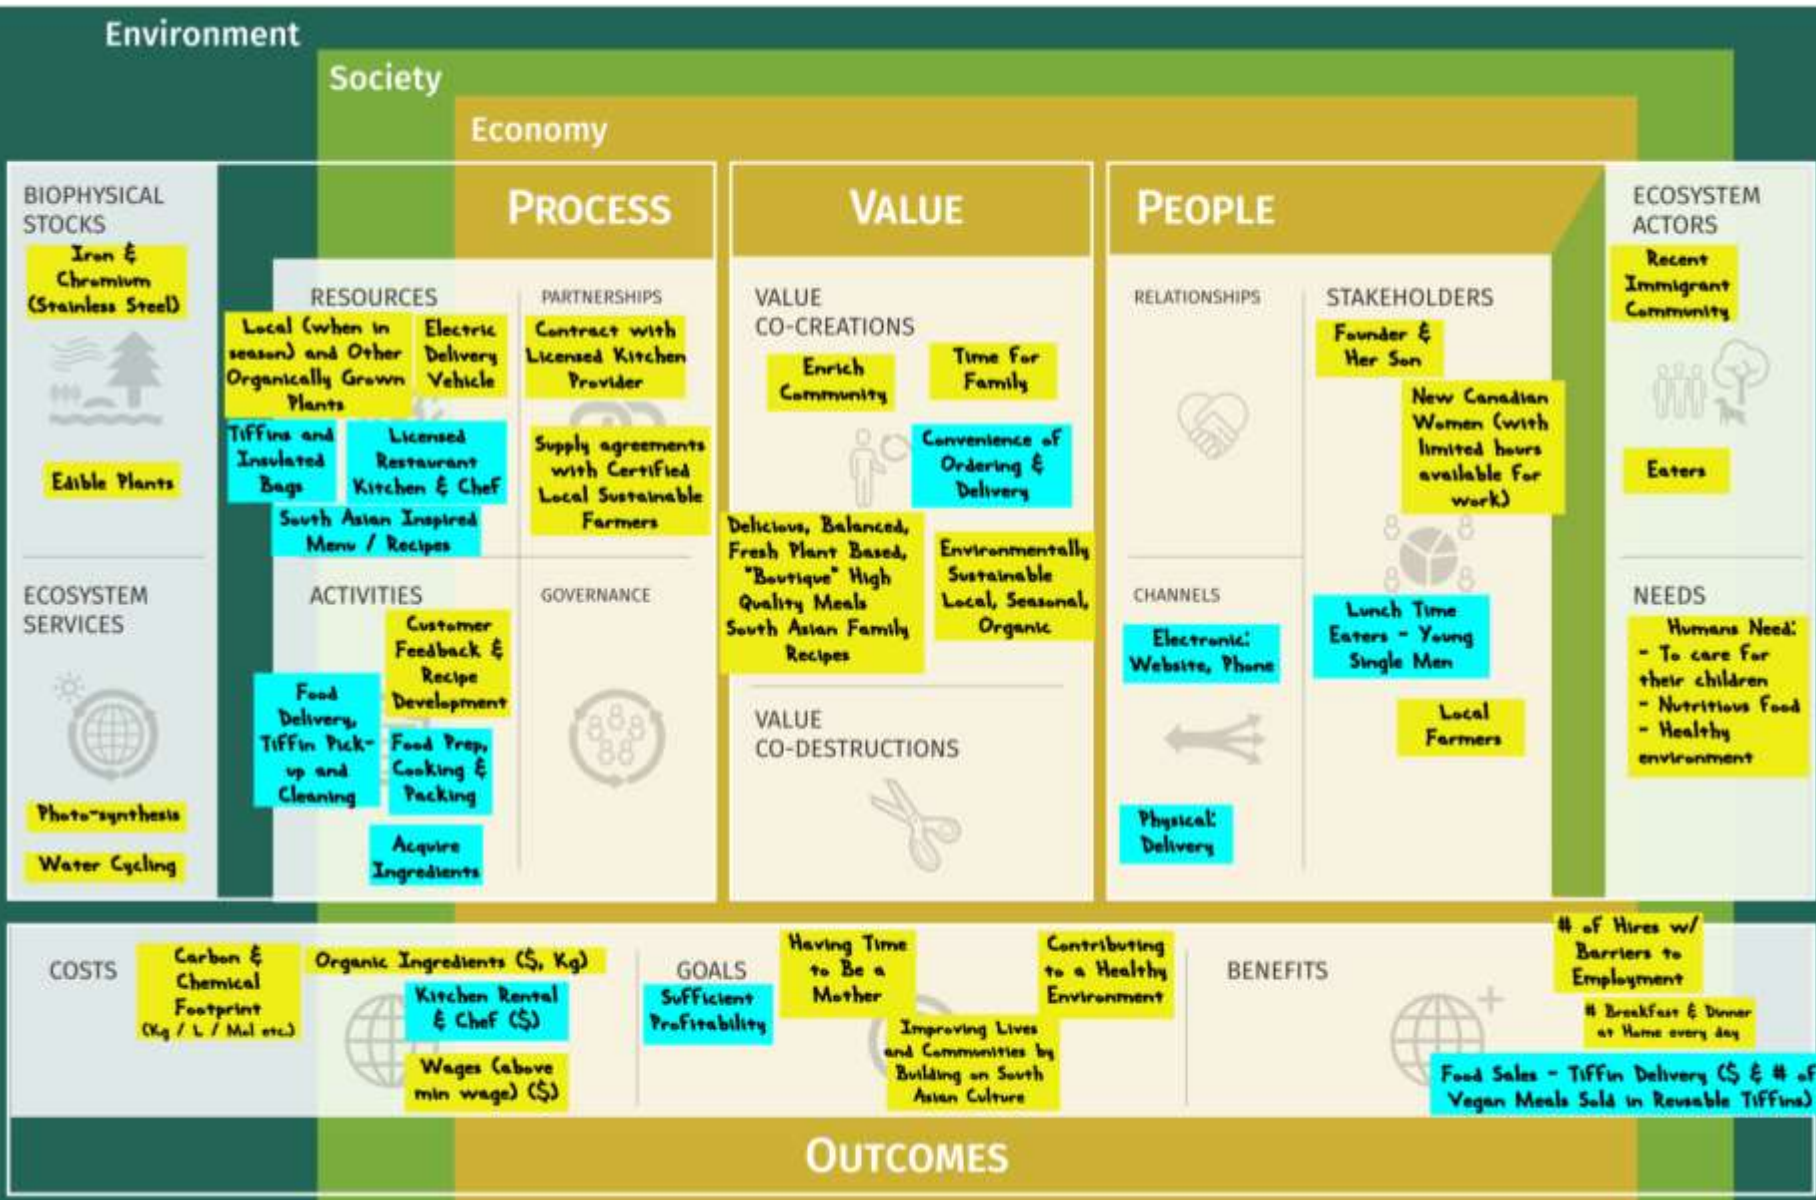

Perspectives on a Business Model

Describe What's Unique... & Shared

Tiffinday Business Model

Environment

Business is part of the economy, which is created by our society, which is ultimately and immediately dependent on the environment. The vital context for any business - all risks and all opportunities - is yours.

Business is also part of a value contribution of other businesses, citizens, communities, individuals, animals, plants and the environment. Answering the quest posed by the context for your business, or how your answers need to reflect these vital contexts and the other stakeholders in your value contribution.

Society

Economy

Narayana Health

PHYSICAL STOCKS

What tangible materials are moved, flow or transformed during the Act/Value? (How does this business's Goals?)

How does this business's Goals?

How does this business's Goals?

How does this business's Goals?

How does this business's Goals?

How does this business's Goals?

How does this business's Goals?

How does this business's Goals?

How does this business's Goals?

How does this business's Goals?

How does this business's Goals?

PROCESS

How, where and with what does this business co-create its value to achieve its Goals?

RESOURCES

What tangible and intangible resources are required in order to execute this business's Act/Value and so achieve its Goals?

44. Healthcare Resources	45. Private Sector Resources
46. Government Support	47. Natural Resources
48. Public Support	

PARTNERSHIPS

Which Stakeholders are formal partners of this business?

To which Resources do these partners enable this business to gain preferred access?

Which Act/Value do these partners undertake for this business?

34. Government	35. Investors and Donors
36. Board of Directors	37. ISRO

ACTIVITIES

What value adding work, organized into business processes, is required to achieve this business's Goals?

57. Creating collaborative networks to find innovative ways to deliver healthcare	58. Patient-centered business strategy	59. Reinvestment of accretals
60. Positioning healthcare on a mass scale with quality and efficiency	61. Medical CSR for NGOs	62. Collaborations with Governments. For ex. Use their land and in exchange to help them keep their healthcare premises to the public
63. Professional excellence and social transformation	64. Medical Education	65. Collaborations with other hospitals
66. Research Activities	67. Collaborative Treatment Planning to ensure quality services	68. Transparent itemized billing discipline enhances patient comfort

GOVERNANCE

Which Stakeholders get to make decisions about who is a legitimate Stakeholder, the Goals of this business, its value proposition and its Processes?

How are the Governance arrangements of this business?

Board of Directors	71. Institutionalized audit system
72. Private Sector (other hospitals and clinics)	73. Government

VALUE

What value is co-created and co-destroyed now and / or in the future between this business and all the Stakeholders involved?

VALUE CO-CREATIONS

What are the (positive) value propositions of this business?

What value is co-created with each Stakeholder, satisfying the Needs of the associated Eco-System Actor, from their perspective (world-view), now and / or in the future?

1. Global pioneer in a new model of healthcare	2. High Quality Healthcare with care and compassion of an affordable cost on a large scale and making it accessible	3. Creating healthy societies	4. Innovation and efficiency - to continuously reduce cost of delivery of high quality health care and improve reach
5. Comprehensive Care - providing accessible care that makes a difference to patients	6. Excellence - create a culture of individuality resulting in better quality of care, service, and value to all stakeholders	7. Respect for all - recognize the contribution of every employee and respect rights and dignity of every patient and employee	8. Accountability - to ensure commitment with integrity and transparency to patients, employees and investors
9. Collaborators with Government for the masses	10. No one is refused treatment due to lack of funds - Open to Everyone		

VALUE CO-DESTRUCTIONS

What are the (negative) value propositions of this business?

What value is co-destroyed for each Stakeholder, hindering the satisfaction of the Needs of the associated Eco-System Actor, from their perspective (world-view), now and / or in the future?

94. Challenge of conformity being innovative - creating high standards	95. Challenging the status quo - public and private sectors	96. Bringing stakeholders with different world views together	97. Retaining the culture beyond Devil Story
--	---	---	--

PEOPLE

Who are all the people involved in this business, the people this business does it to, for and with?

RELATIONSHIPS

What relationships with each Stakeholder must be established, cultivated and maintained by this business to its Channels?

What is the function of each Relationship in each Value Co-Creation or Value Co-destruction on minimum for each Stakeholder?

23. Long-term and active patient and family relationships	24. Long-term and collaborative relationship with the Government
25. Long-term and collaborative relationship with Donors	26. Vision and mission alignment with the board of directors

STAKEHOLDERS

How is each Eco-System Actor involved in this business? What roles does each eco-system actor take?

Examples: customer, employee, investor, supplier, community, regulator, franchisor

11. Patients - National and International	12. Healthcare Providers	13. Investors and Donors
14. Government	15. Economically Weaker Sections of Society	16. General Public

CHANNELS

What Channels will be used by this business to communicate and develop Relationships with each Stakeholder (and vice versa)?

Examples: Retail, Face-to-Face, Internet, Phone, Mail, Transport

17. Hospitals (National and International presence)	18. Dr. Devi Story, talks, articles, interviews	19. Awards and Recognition of Work
20. CSR Initiatives (Corporate Social Responsibility)	21. Word of Mouth	22. Government

GOALS

What are the Goals of this business that its Stakeholders have agreed?

What is this business's definition of success: environmentally, socially and economically?

81. Provide affordable and compassionate healthcare on a global scale	82. Health and Wellness in Individuals and Societies	83. Investment towards the expansion of business model	84. Transparency	85. Collaborations	86. CSR
---	--	--	------------------	--------------------	---------

BENEFITS

How does this business choose to measure the Benefits that result from its business model (Environmentally, Socially, Economically)?

87. Uplifting the rural masses	88. Healthy Society	89. Patient-Centered care	90. Low Cost Surgical Hospital Model	91. India's first economic healthcare provider
--------------------------------	---------------------	---------------------------	--------------------------------------	--

OUTCOMES

How outcomes demonstrate whether this business has achieved its Goals, achieving its Stakeholders' definition of success over time? How does this business measure the benefits and costs to determine whether or not these outcomes are achieved?

A *Societal* Business Model?

- Can we create a process for participatory systemic civil planning ?
- Can we adapt the FBC as a planning tool?
- Would a canvas be sensitive to capturing stakeholders & community proposals?
- Do the *Flourishing* distinctions provide guidance for a sustainability case?

Flourishing Community as a Business Model

Strongly Sustainable Business Model adapted to future design of “Flourishing Cities”

Urban Ecologies 2015 Conference

Canvas + Generative workshop

- Ontological Design
- Convergent & redirective
- Foresight (Anticipatory)
- Boundary Critique
- Rich Picture Models

Both canvases ask 20 Questions:

SSBM Ontology	Flourishing Society Ontology
1. Actor	
2. Needs	
3. Stakeholders	Citizens & community participants
4. Relationships	
5. Channels	
6. Value Propositions	Value Co-Creation /Co-Destruction
7. Organization	Institutions & organizations
8. Decisions	Governance
9. Partnerships	Partners in Services
10. Resources	Processes
11. <i>Biophysical Stocks</i>	
12. Activities	
13. <i>Ecosystem Services</i>	
14. Success	Accountabilities
15. Tri-profit	"
16. Valuation method	"
17. Processes	
18. Costs	
19. Revenues	
20. Assets	

Environment

A city that respects rights of nature
Publicizes values of environmental and animal life care
Establishes home rule regulations protecting local biosphere assets
Strong sustainability enforced by rule, culture, and public policy

Society

Strong social safety nets are co-developed and maintained
Reuse of assets for socially beneficial distribution (shared housing, workspaces, Internet)
Socially innovative law enforcement and asset management
Housing socially novel institutions - promoting new schools, service organizations, business types

Economy

Strong support for B Corps and new organizational forms
Turning "sharing economy" on its head by providing support for regionally cooperative services

Resources

BIO- PHYSICAL STOCK

Lakes, Rivers, Watershed
Forests, Wetlands
Conservation districts
Air quality
Arable land, soil quality
Insect & animal pops
Unique regional stocks

ECO- SYSTEM SERVICE

Water restoration
Air filtering & dispersion
Water pressure flow
Erosion control systems
Flood control services
Sun / heat sink mitigate

PROCESSES

Concluding Questions

- How might this model enable conversations for Flourishing?
- What are the relationships between business & social ecologies in a *place*?
- How might we adapt this approach in policy debates?
- How could this become a practical, useful model for civic engagement in policy making?
- How might we adapt the design process to include the dynamic feedback in an ecosystem model?
