.. \4\ Generative Forces

.. \5\ Conclusion

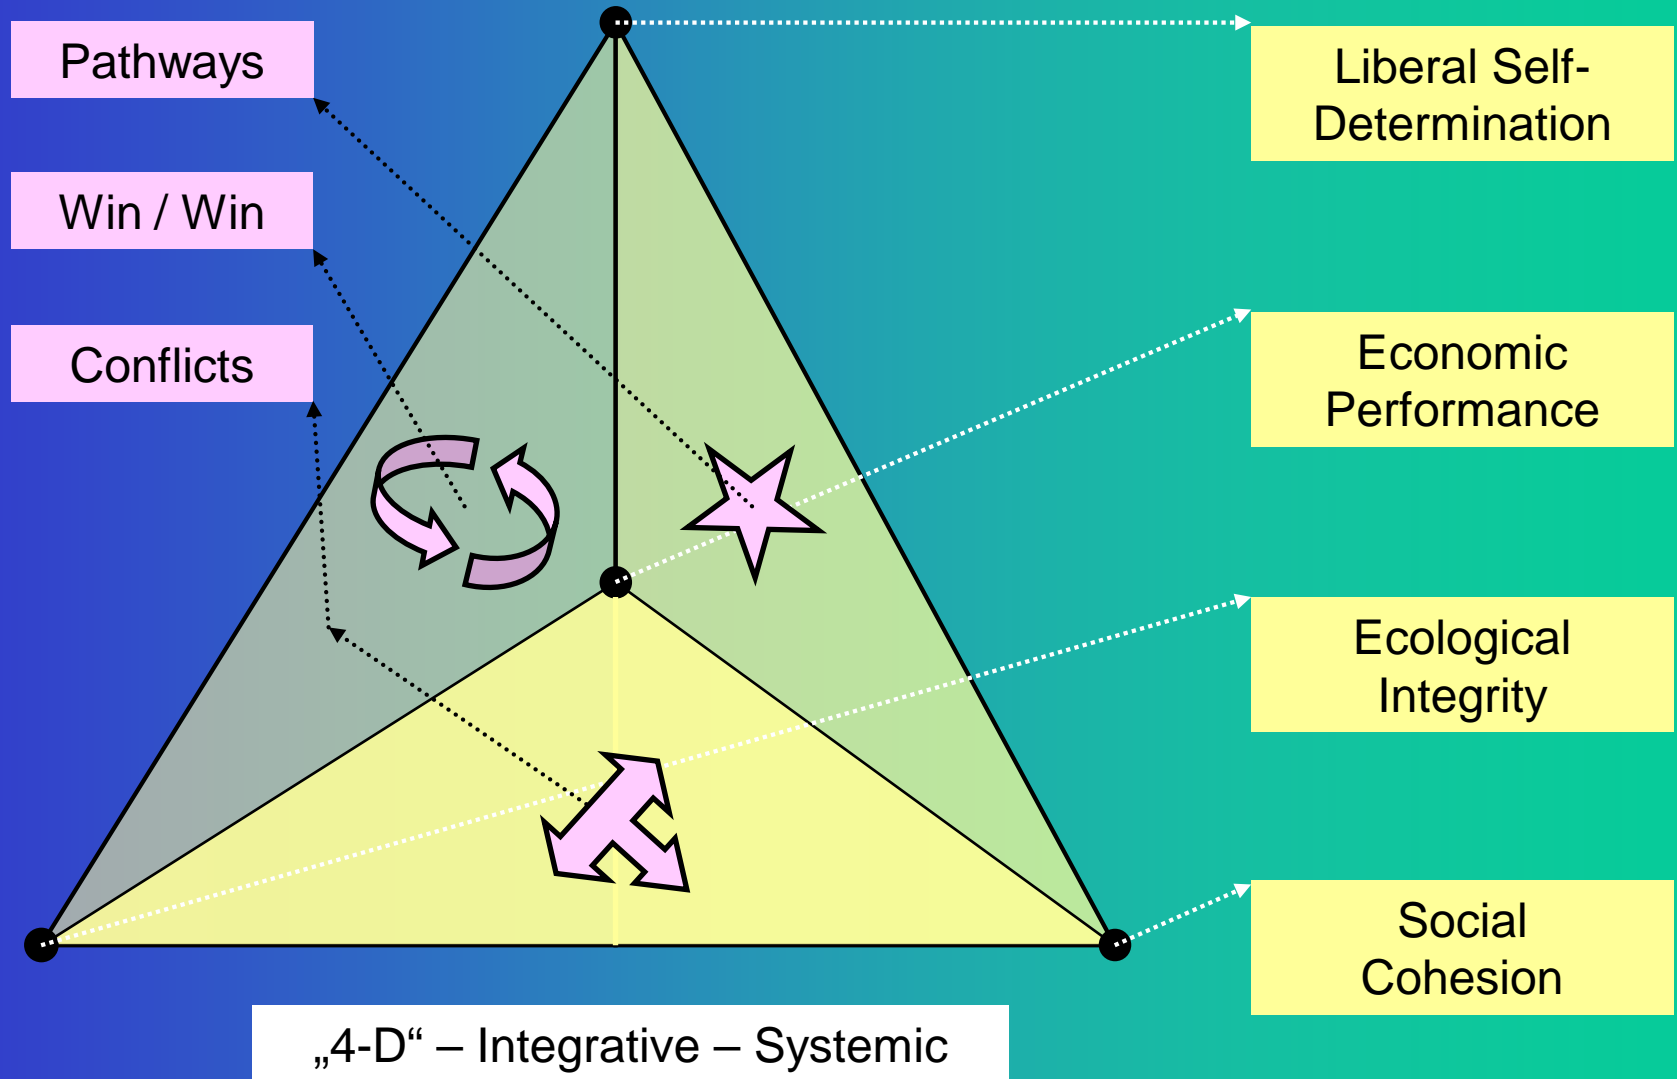

Mushrooming

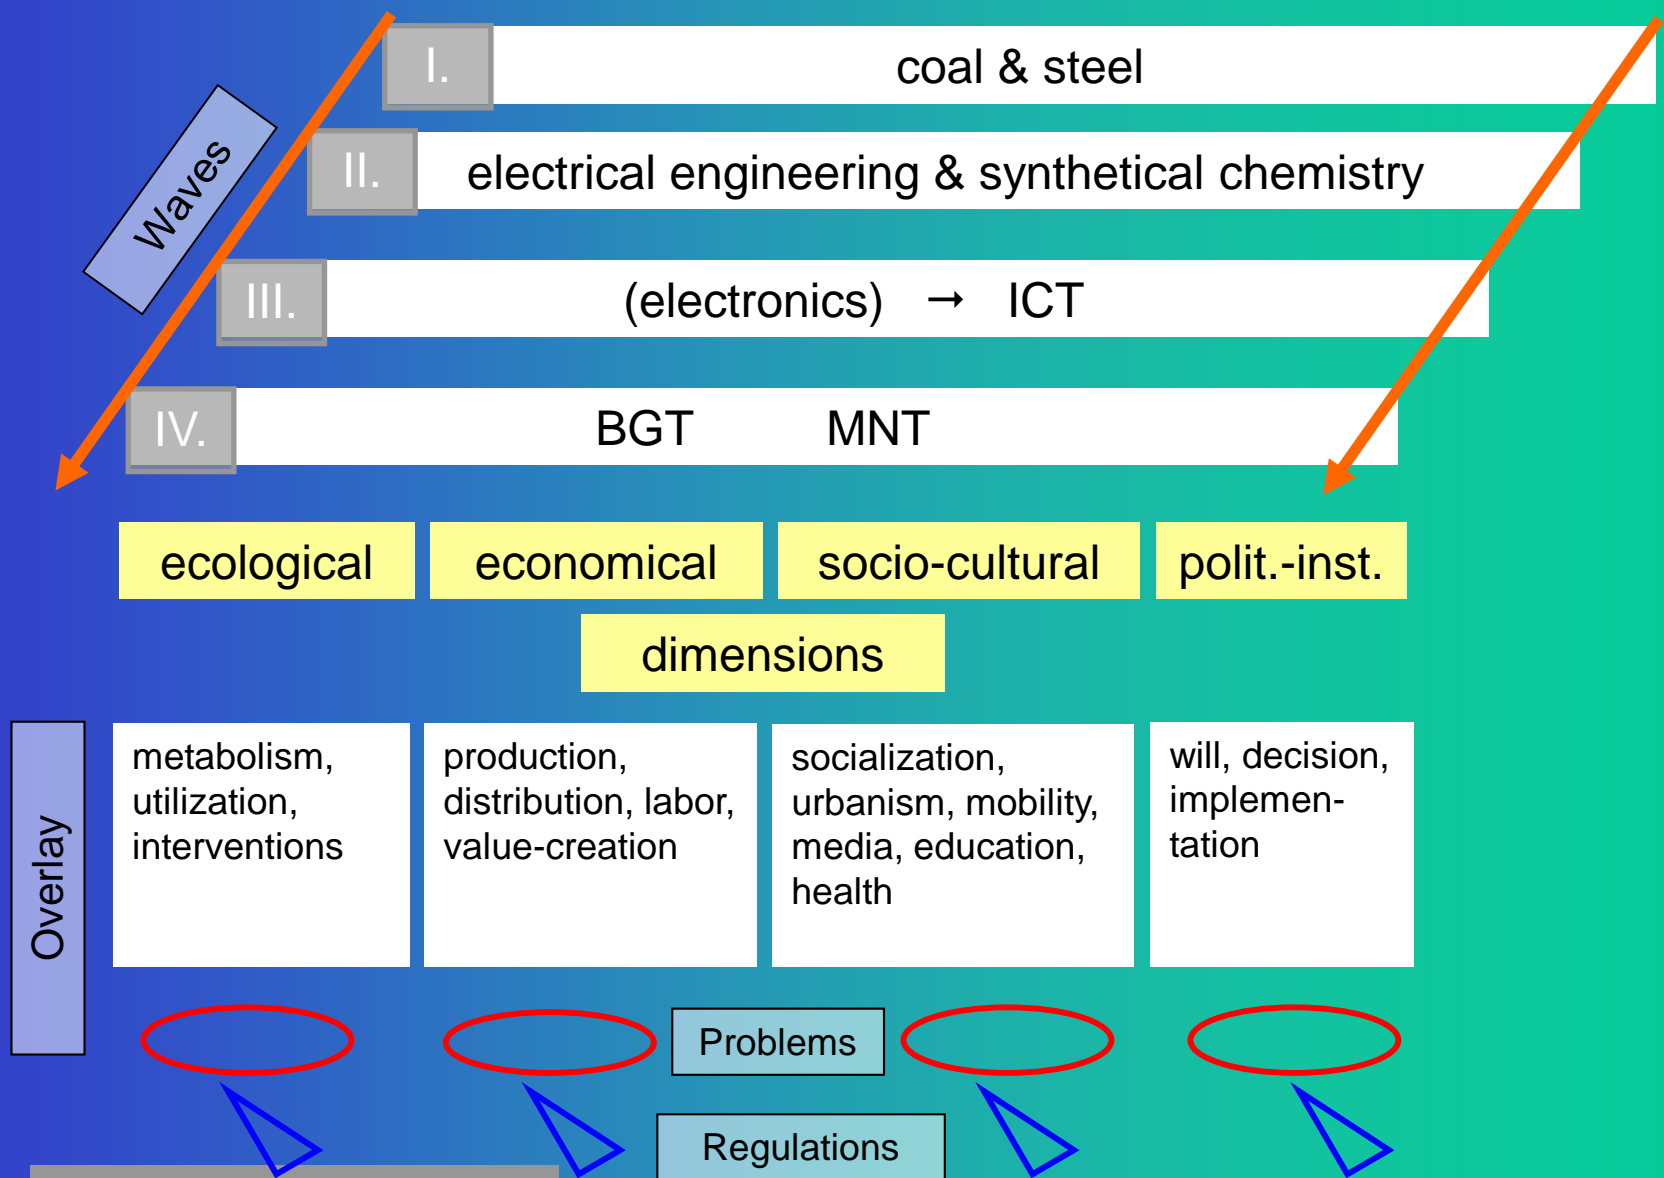

Nowadays, the need to control what we eat becomes essential. "Mushrooming" is a new experience in the edible mushroom growing, adapted to home environment and recycling household waste. Household waste such as paper, newspapers, cardboards, paper towels, coffee grounds, textile, bread ...

.. \3\ Leading Principles

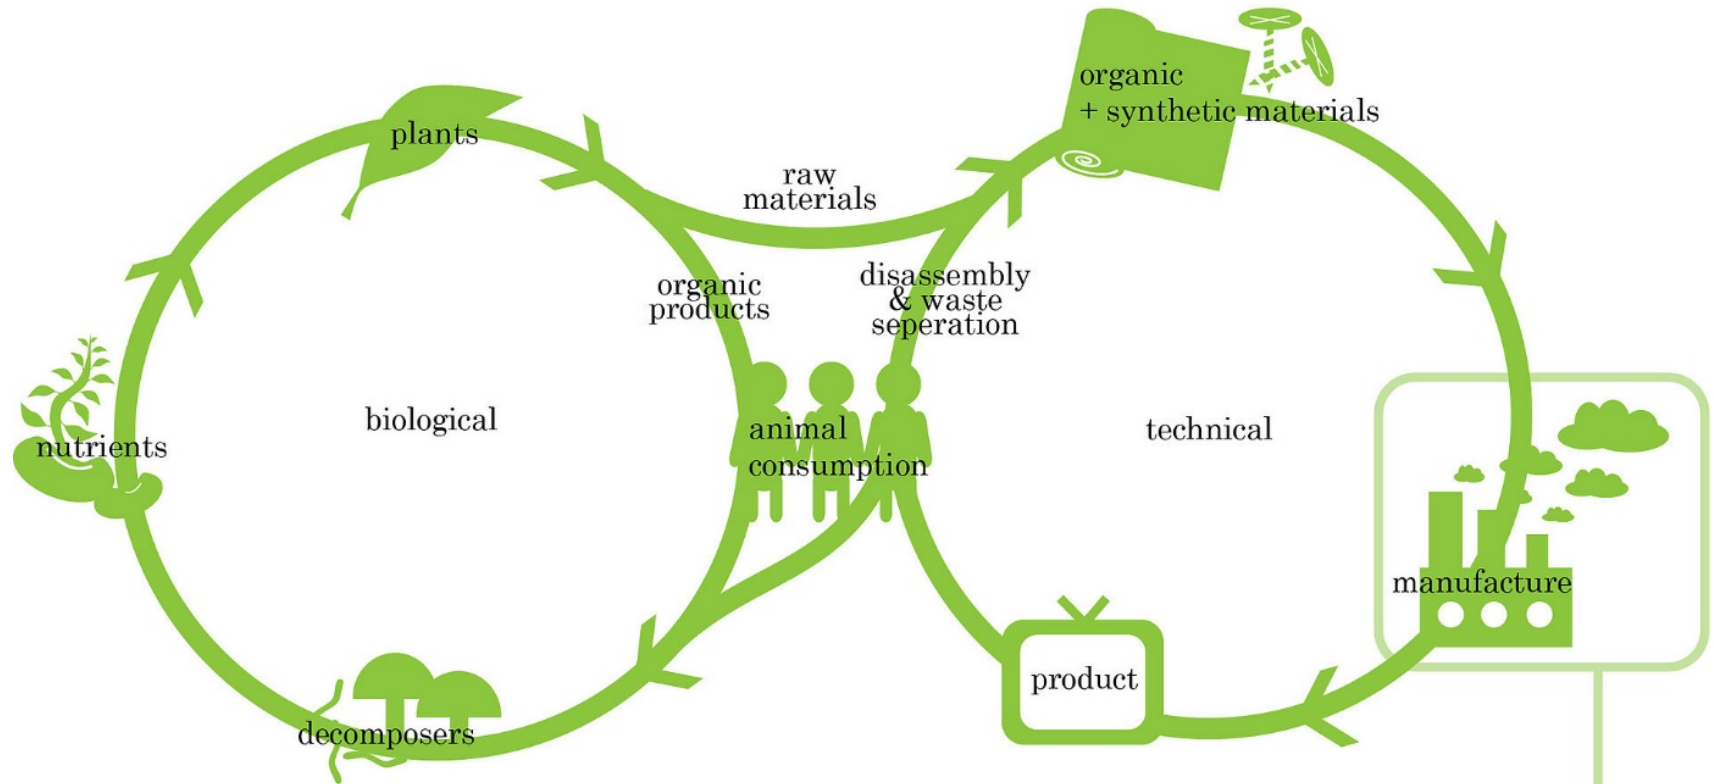

Efficiency / Sufficiency / Consistency

strategy	dimension	focus	goal	examples	design	problem
efficiency	technology	resources	reduce energy and material intensities per good/service	drip irrigation LEDs	passive buildings	rebound effects
sufficiency	culture	needs	limit consumption of goods/services	car sharing no meat	self-sufficient communities	inertia of habits
consistency	ecology	qualities	close cycles of material flows / energy streams out of renewable sources	compostable plastics solar + hydrogen	cradle to cradle	missing options

.. \3\ Leading Principles

Consistency

CradletoCradle

- 5 criteria
- 1 100% Renewable Energy Use
 - 2 Water Stewardship clean water output
 - 3 Social Responsibility positive impact on community
 - 4 Material Reutilization recyclability / compostability
 - 5 Material Health impact on human & environmental

.. \4\ Generative Forces Sustainability Science

.. \4\ Generative Forces Actors / Cultures / Systems

social sciences three
frameworks:

actors	origin of <u>generative forces</u>
cultures	patterns in motion
systems	evolution of structures

drivers / conditions
for eco-social
transformations?

.. \4\ Generative Forces Actors / Cultures / Systems

actors

generative self
productive personality

cultures

innovative &
creative
organizational
cultures
("medici effect")

systems

self-realization of the
human being ..

(Italy, 1494)

.. \4\ Generative Forces Cultural Diversity +/-

**encounter of
cultures**

**„covivencia“,
progress,
welfare**

**„clash of
civilizations“**

**„coexistence“,
terrorism,
wars**

.. \4\ Generative Forces Organizational Cultures

„A **pattern of shared basic assumptions** that a group has learned as it solved its problems of external adaptation and internal integration, that **has worked well enough to be considered valid** and therefore, to be taught to new members as **the correct way to perceive, think, and feel** in relation to those problems.“

(Edgar Schein 1985)

.. \4\ Generative Forces Organizational Cultures

Artefacts

visible & audible patterns / structures
(easy to observe, difficult to decode, recognize)

Values

strategies, goals, philosophies
(articulated, documented legitimations,
rationalizations)

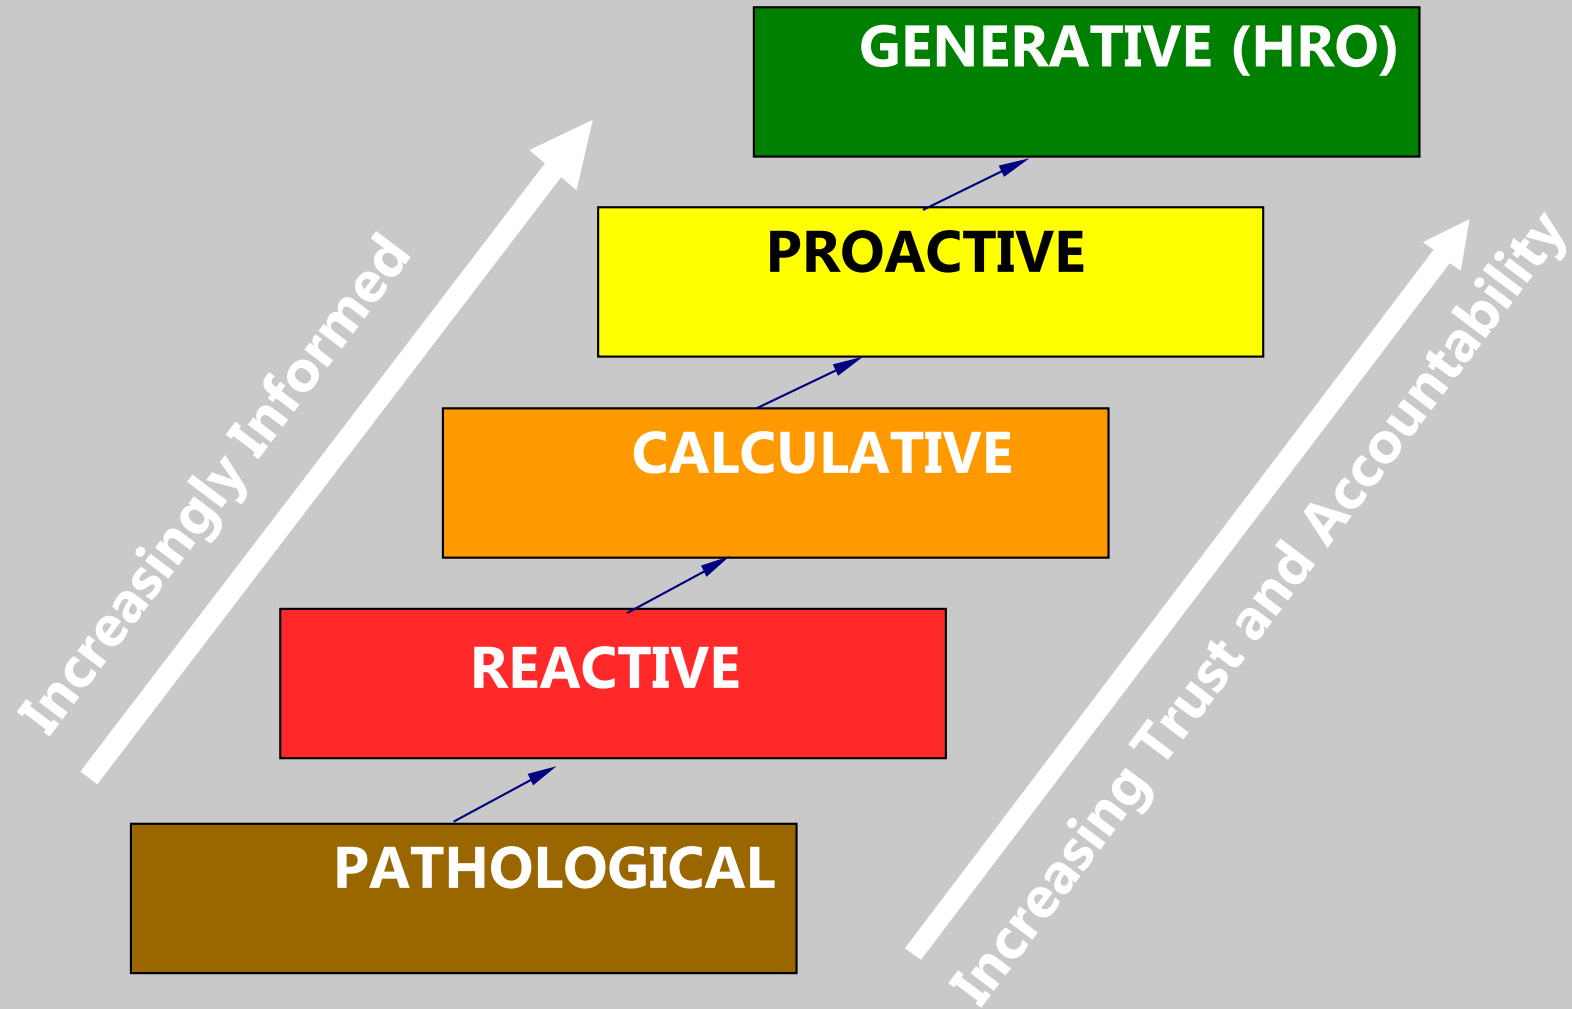

Basic Assumptions

unconscious beliefs, assessments, attitudes,
emotions that are taken for granted, as natural
(primary sources of values and actions)

(according to Schein 1985)

.. \4\ Generative Forces Organizational Cultures / HSE Ladder

(Patrick Hudson 2007)

.. \5\ Conclusion

How to become fit for the future?

»We can think towards the future and, more important still, think backwards from the future.

And by the way we perceive or even do not perceive what has not yet become reality, we take part in shaping it.

Being fit for the future [future-capable] therefore means to obtain orientation not only from what actually already exists, but to be sensitive to the generative forces of the world that need suchlike awareness.«

(Hildegard Kurt: Wachsen! 2010)
