# Bridging silos

Using Gigamapping workshop to work better cross silos

# Context

- ◆ Expertise organised in separate departments/divisions = Silos
- ◆ More complexity demands more work involving several silos
- ◆ Problem solving lacks holistic overview and systemic understanding
- ◆ We taught Gigamapping and were at the same time bridging silos
- ◆ To ensure our presentation is relevant to you (and to increase our understanding) we want you to reflect around some key words – before we present how the workshop was designed

# In pairs / trios – please discuss:

- ◆ When you want to bridge silos – how does these topics influence the result
- ◆ Choose one word and if you are done – choose a second:
  - ◆ Goal
  - ◆ Competence
  - ◆ Emotions
  - ◆ Power Dynamics

- ◆ Goal
- ◆ Competence
- ◆ Emotions
- ◆ Power Dynamics

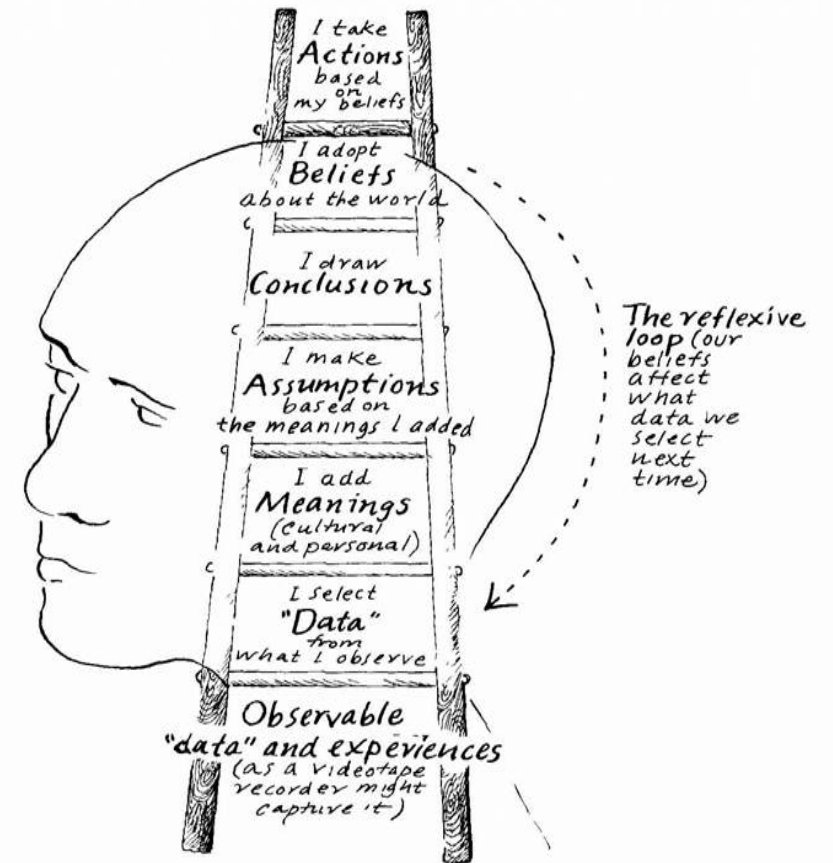

## Rough agenda of the workshop in which we were bridging silos

- ◆ Theory presentation – Gigamapping in a nutshell
- ◆ Gigamapping practice – real cases
  - ◆ Changing axis
  - ◆ ZIP & Threshold analysis
- ◆ Systems oriented communication
- ◆ Reflecting on how to improve communication using Gigamapping
- ◆ Creating individual comitment

# Systems Oriented Communication

Goal

Competence

# Power Dynamics

Emotions

# Personal Commitment
