**Karolinska
Institutet**

“Before, the choice was burn out or numb out. Professionals felt strangled by a system that did not provide opportunities for change or creativity... Slowly a system of protocols has accreted around professions that care. There is a premium on being dispassionate, on keeping our distance. Detachment is prized.”

/ Hilary Cottam, Radical Help (2018)

Hierarchy, rigidity, universalism, functionalism and production

But our context is changing and so must our healthcare system.

But our context is changing and so must our healthcare system.

We live longer. YAY!

But our context is changing and so must our healthcare system.

We live longer.

YAY!

To a larger degree we get diseases related to our lifestyles.

But our context is changing and so must our healthcare system.

We live longer.

YAY!

To a larger degree we get diseases related to our lifestyles.

We need a proactive health and care system that supports the inhabitants in a different way.

Healthcare

Design

“I’m sort of staggered actually, when design innovation people sit on a stage and say ‘it’s really important that we take risks, we fail fast, we take more risks, more failure’. Because that shows, more than anything, that they’ve never been on the other side of the table, experiencing the responsibility of running public services.”

- *Halima Khan, Executive Director of Health, People & Impact, Nesta (Romm & Vink, 2018)*

“This is childish and we’re working with a sensitive topic. I’m a public servant, a serious person; I cannot be playing around like this.”

- *Professional participant in InWithForward prototyping (Aguirre, 2020)*

Playfulness, adaptability, personalization, bottom-up and relations

Research projects

Helsehjelpen & remote care
Part of Center for Connected Care (C3)

Space and place in end of life care
Part of research program DöBra

Exploration: *Together Apart* by Angel Lamar , AH0/C3

Staff: "Initially the residents thought
you were really weird"

Making fun?

Designer: "I was afraid of wasting
someone's time, of using resources
more needed elsewhere."

Wasting time?

Resident: "I'm sad you did so little"

Failed explorations?

Staff: "This helps us to see that we have the possibility to change how we interact with each other."

Reimagining relations?

Making fun?
Wasting time?

Failed explorations?
Reimagining relations?

Existing logics do not recognize the value of alternative logics, but that doesn't mean they don't have a role to play in breathing life into a numb system.

Exploring alternative logics opens up for new ways of thinking and working and reduces the taken-for-grantedness of the existing logic.

Embodying questions and sitting with discomfort is an essential opening for personal and systemic transformation.

Thank you for listening!
