# From system to local to system

*Design principles to scale for a system in transition*

De Lille, C.S.H. & Overdiek, A.

**THE HAGUE**  
UNIVERSITY OF  
APPLIED SCIENCES

# Intro – our basic approach in a 3 years project

Design on all levels:

- Design project governance
- Design local labs
- Design tools for labs
- Design lab “franchise”
- Design dialogues/communication/activities

# Method

To understand how we scaled between the local and the systemic, we used our own research reports, the documentation of stakeholder meetings, the archive with physical artefacts (house style, banners, scenario's, presentations) and media publications about the project as data.

We analysed by **plotting themes emerging from this data on the project's timeline, revealing principles and their situatedness in the process**. To generalize the findings of this single and contextual case, we related results to the widely discussed Systemic Design Framework of the U.K. Design Council (2021) and identified a key overlooked phase: that of scaling in a system in transition.

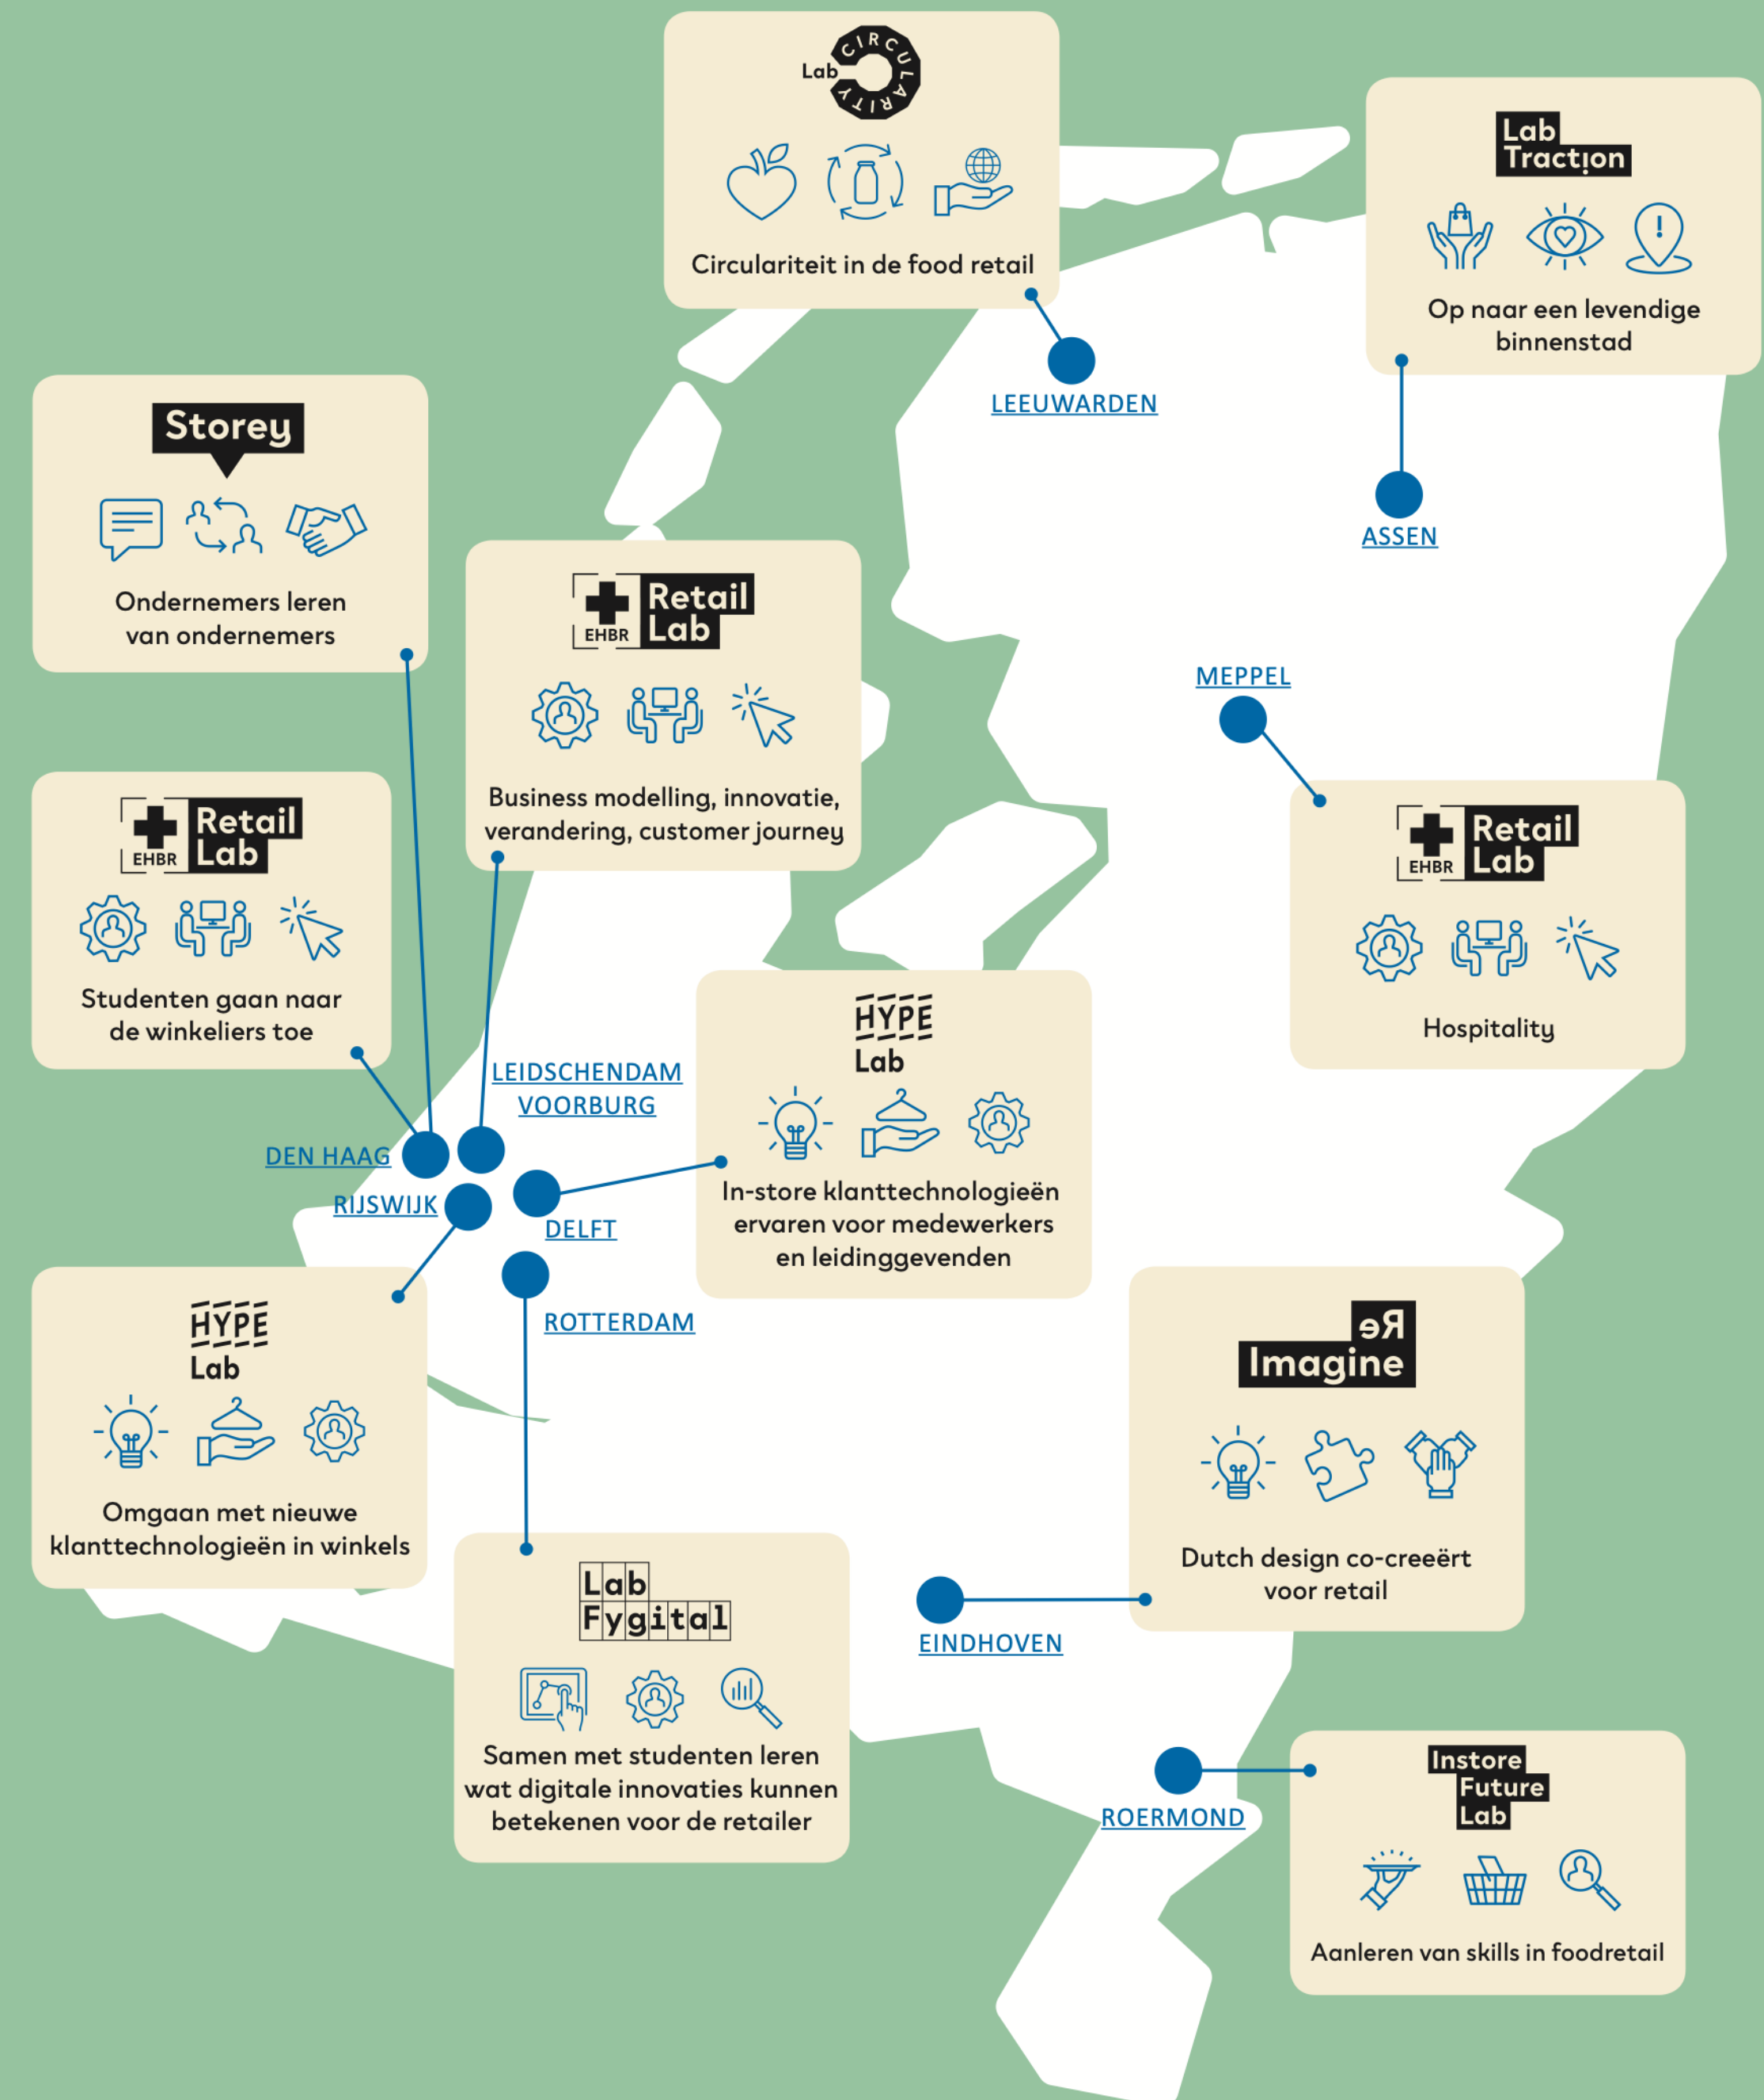

We are currently in the process of applying the findings of this study in the context of four living labs in circular economy, to further investigate the potential of our model for other contexts.

# Future Proof Retail - case

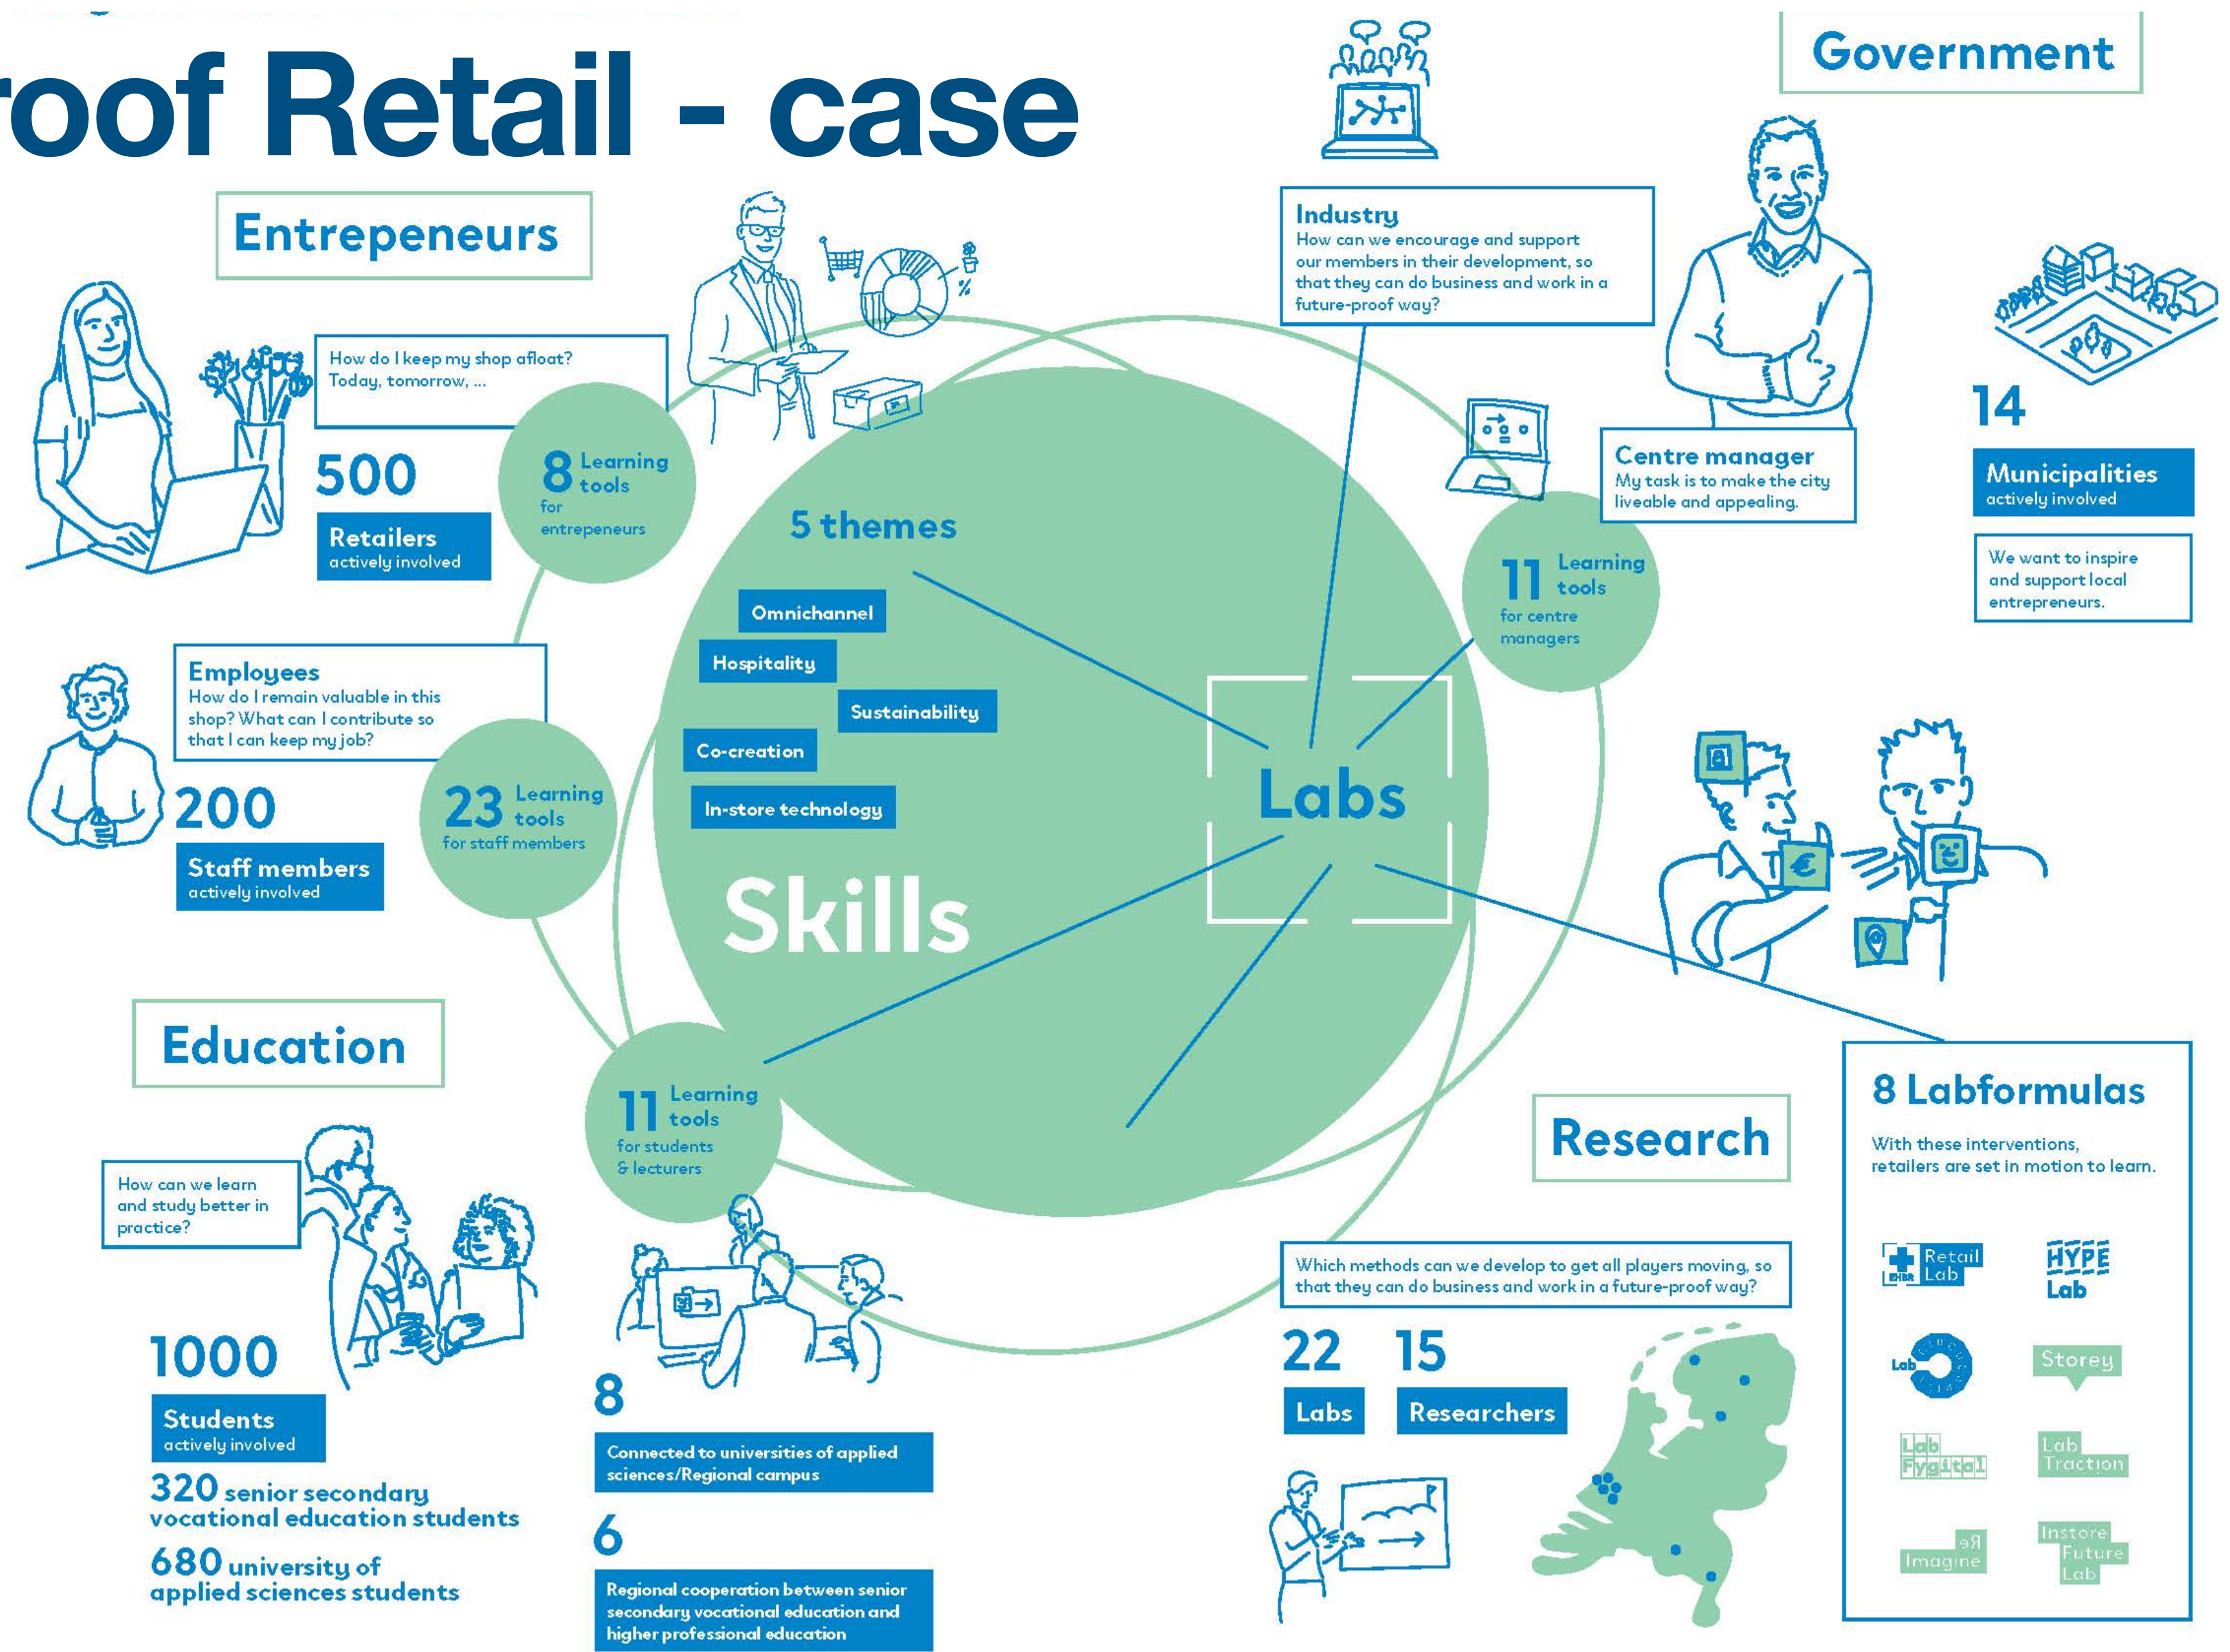

Transition to sustainable & digitally powered sector

- 50+ partners from quadruple helix
- 14 municipalities
- 8 lab formulas
- 22 labs
- 500+ SME retailers

# Future Proof Retail - case

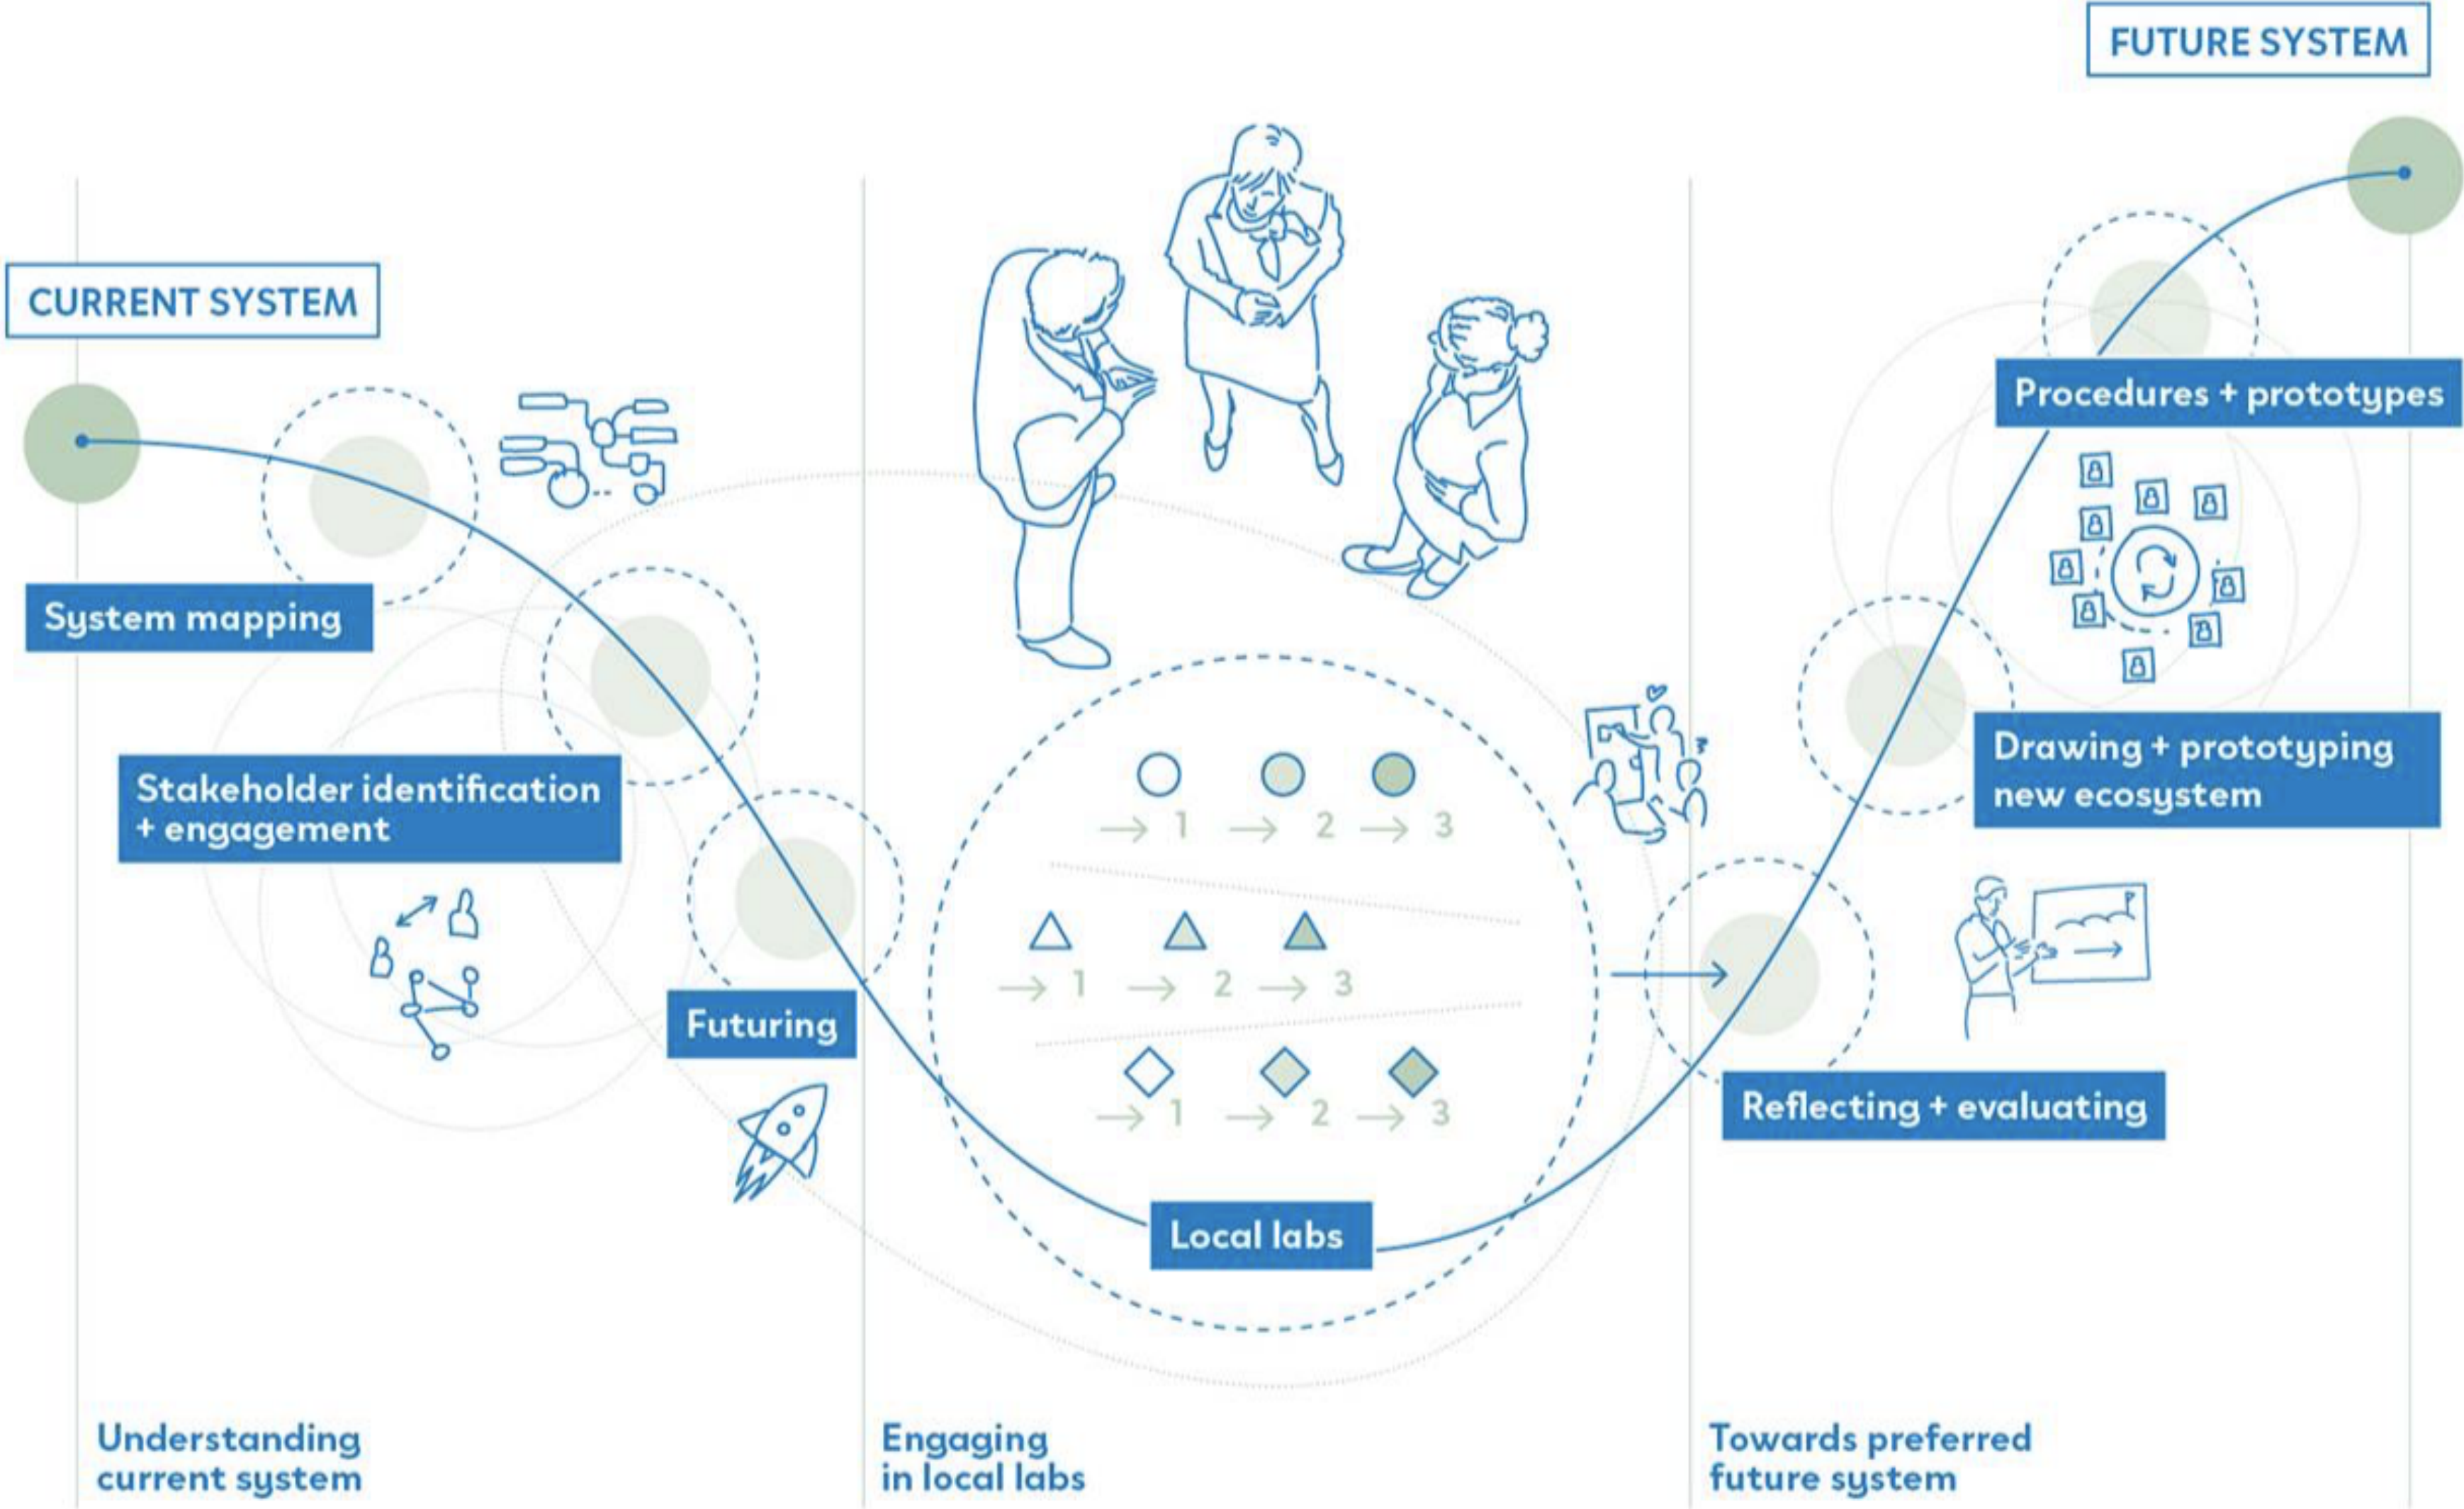

# Results: plotting themes on timeline

## Impacting systems with labs

# Results: preliminary design principles

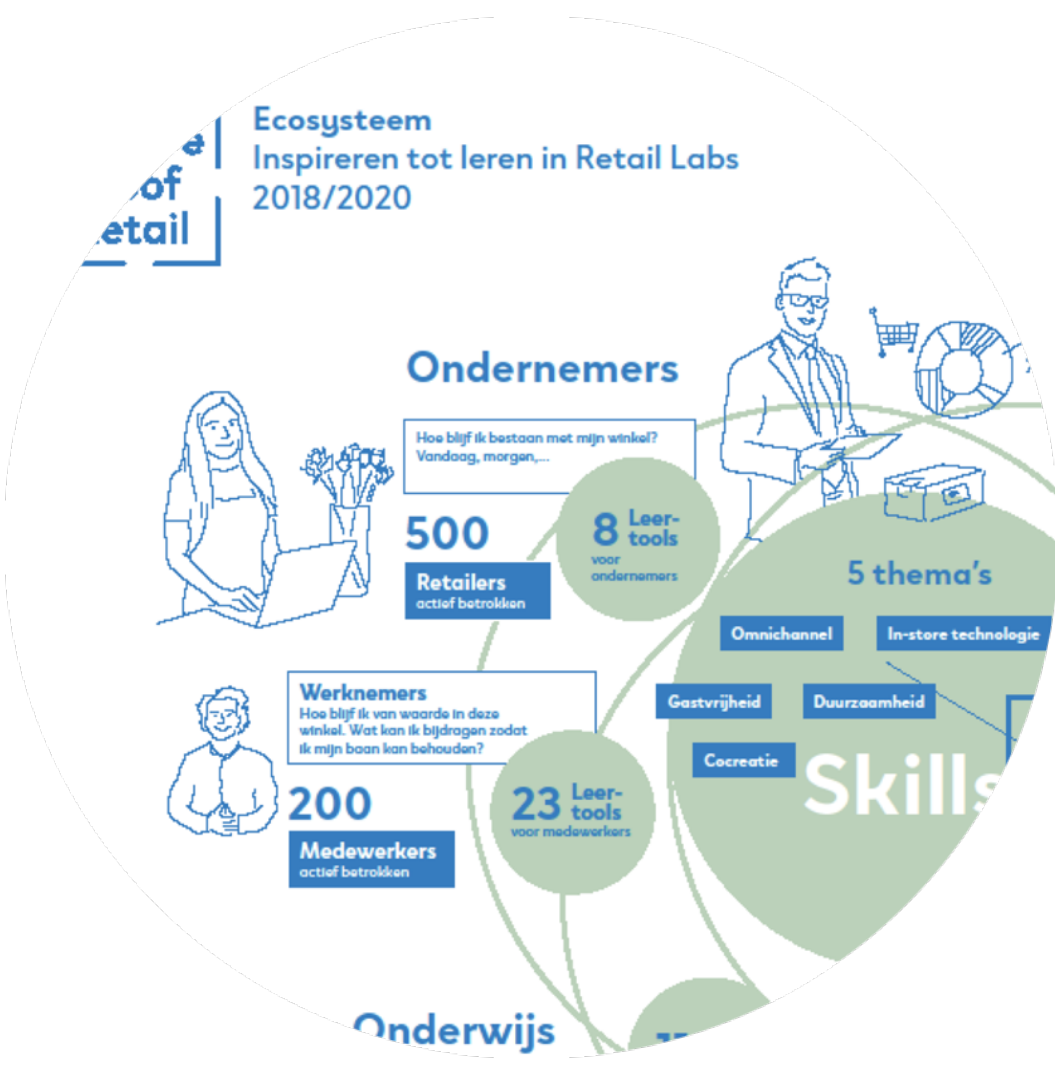

Labs as Catalysts of Change

Storytelling

Distributed Leadership

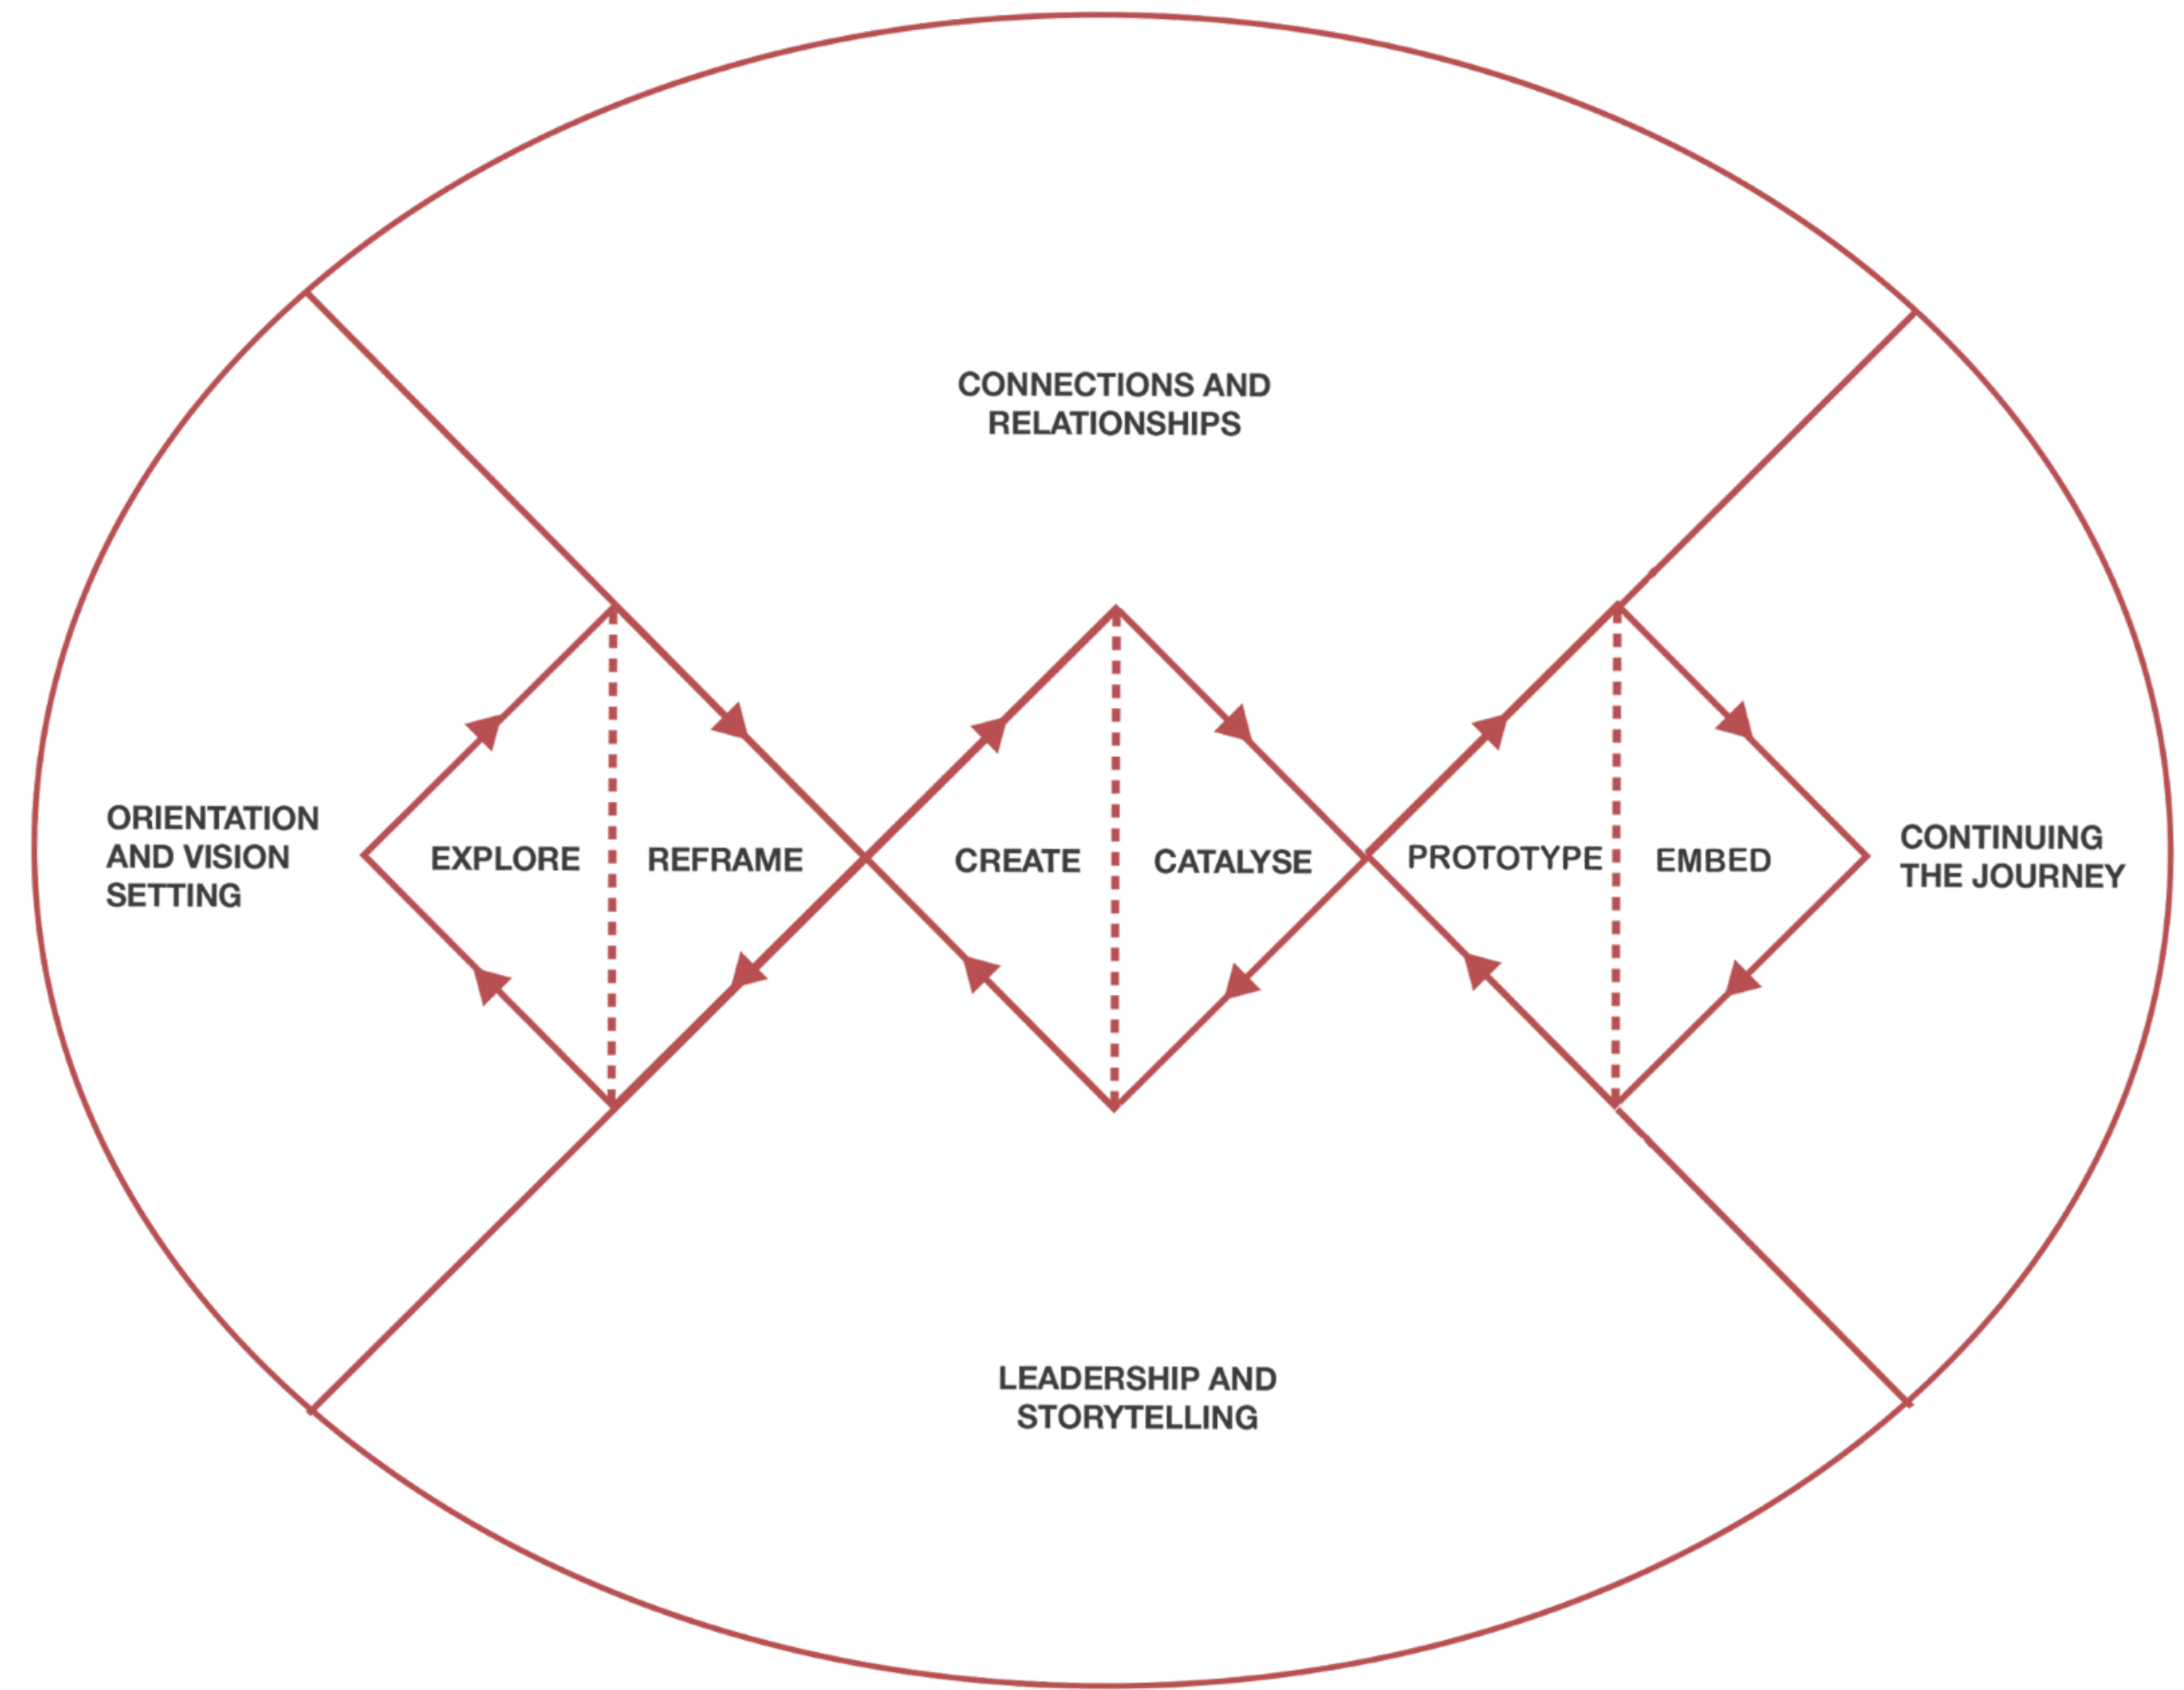

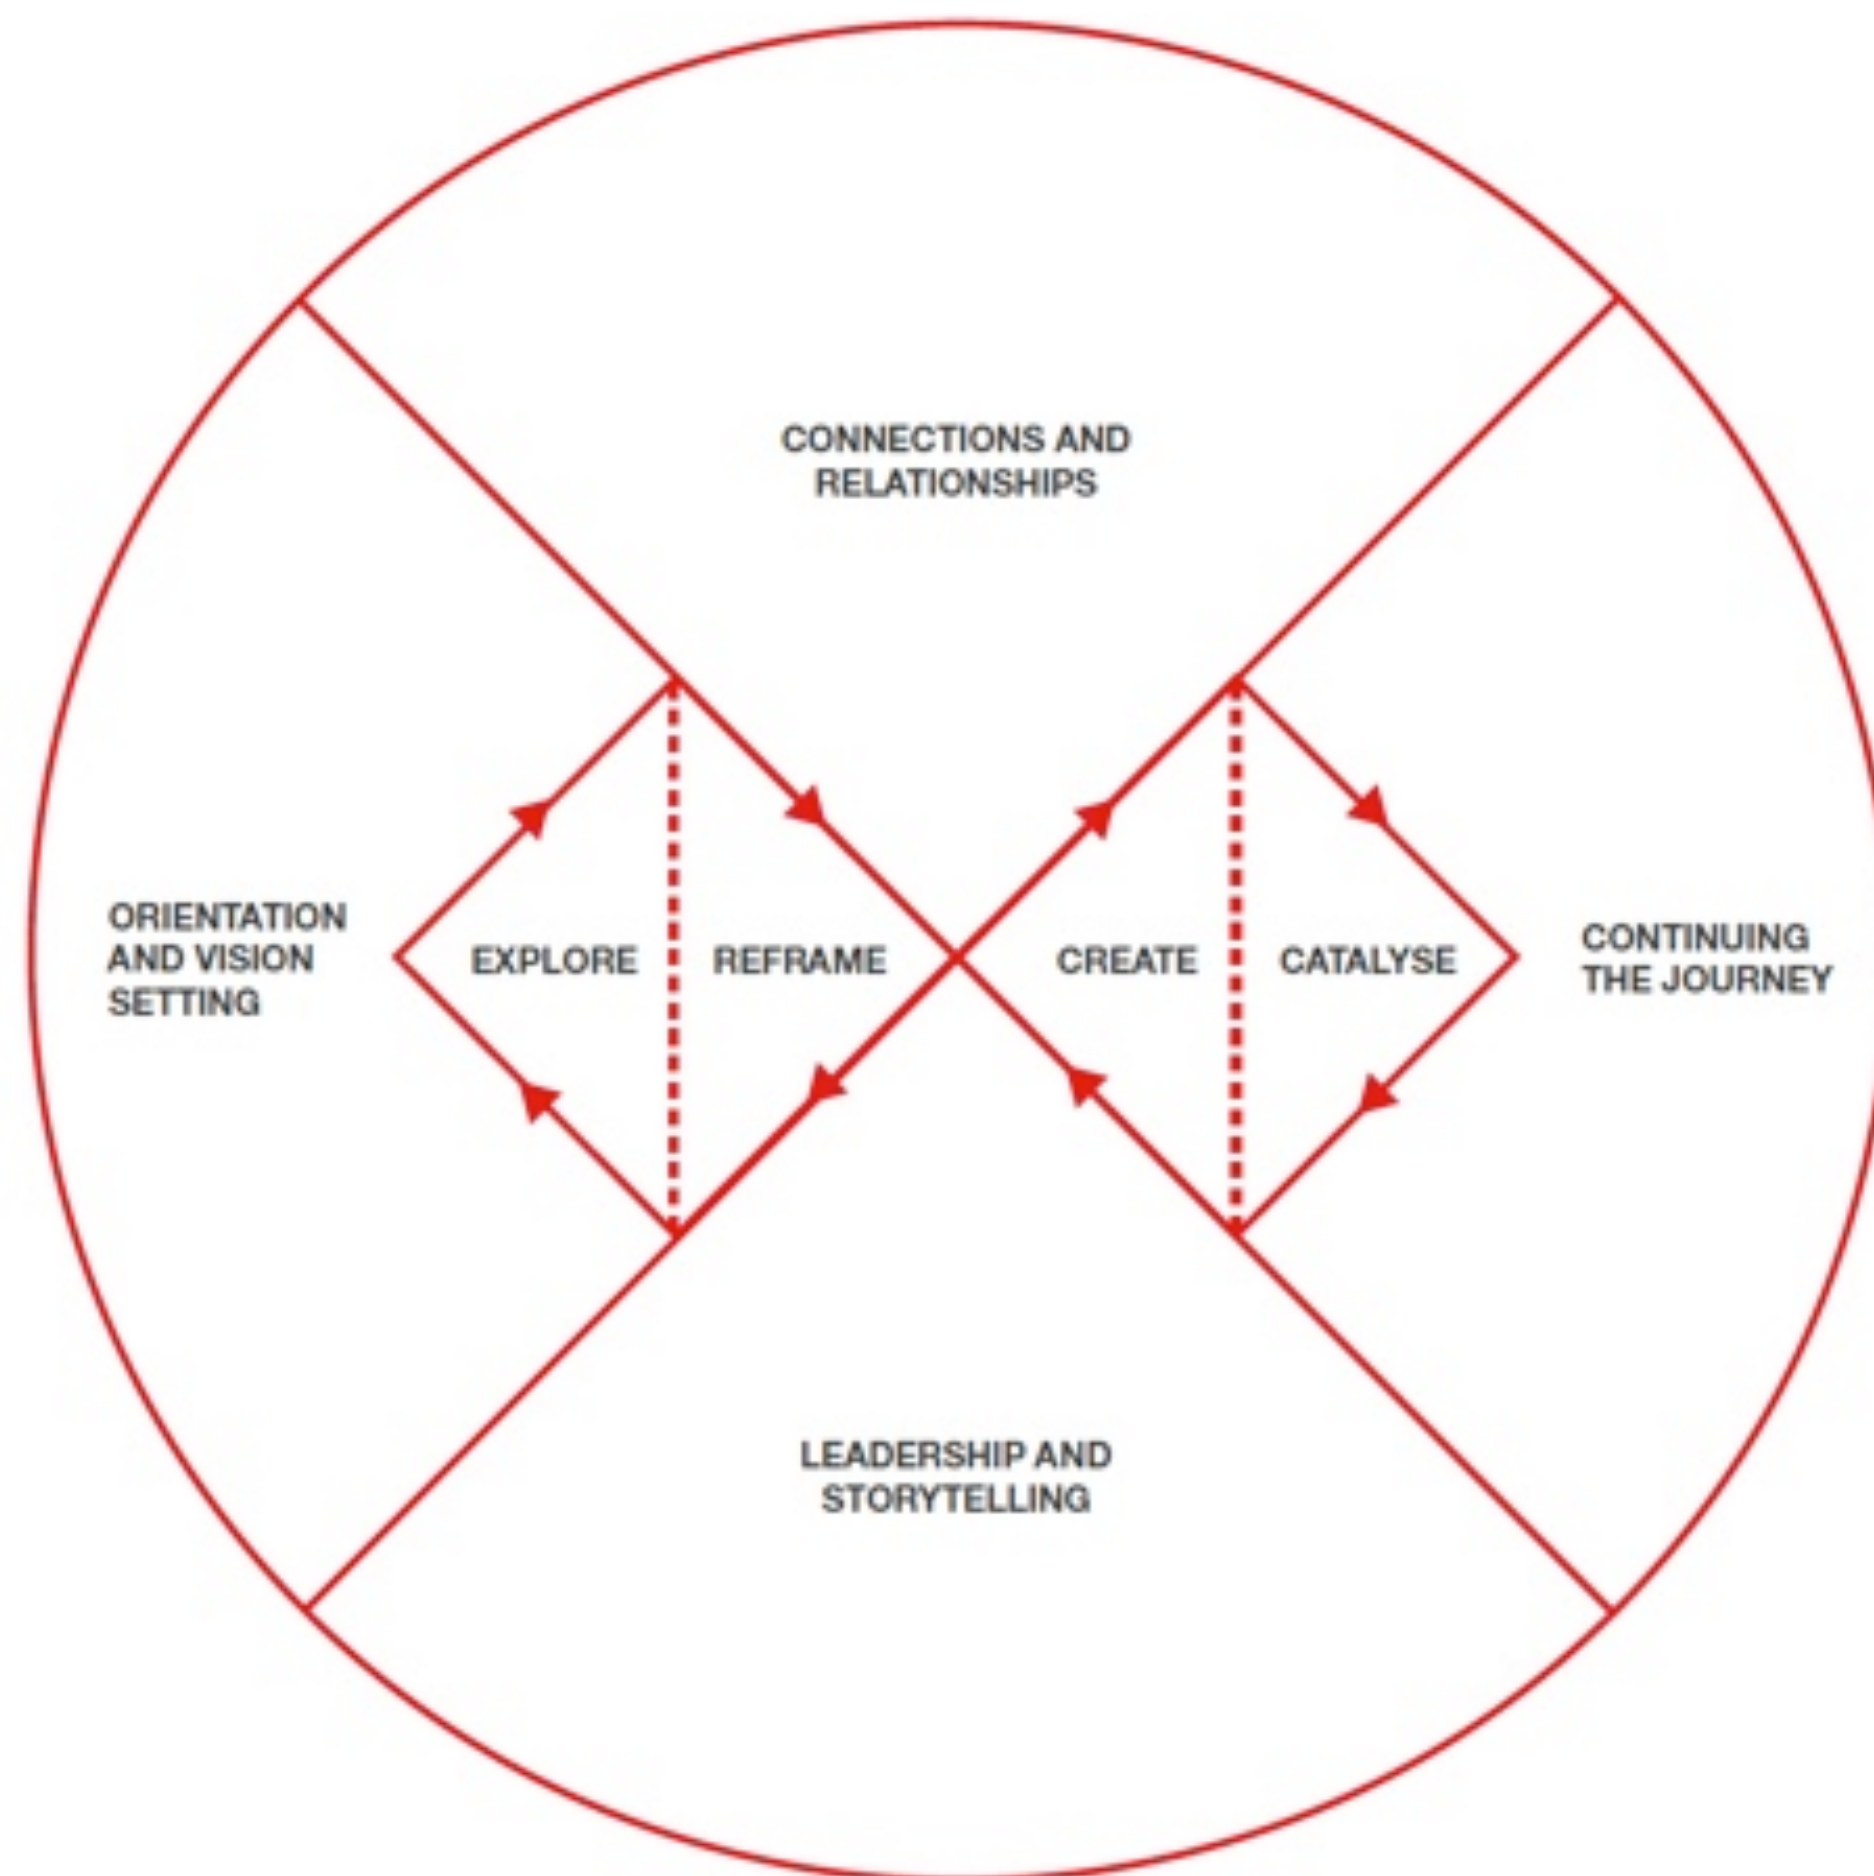

Room for Intuition

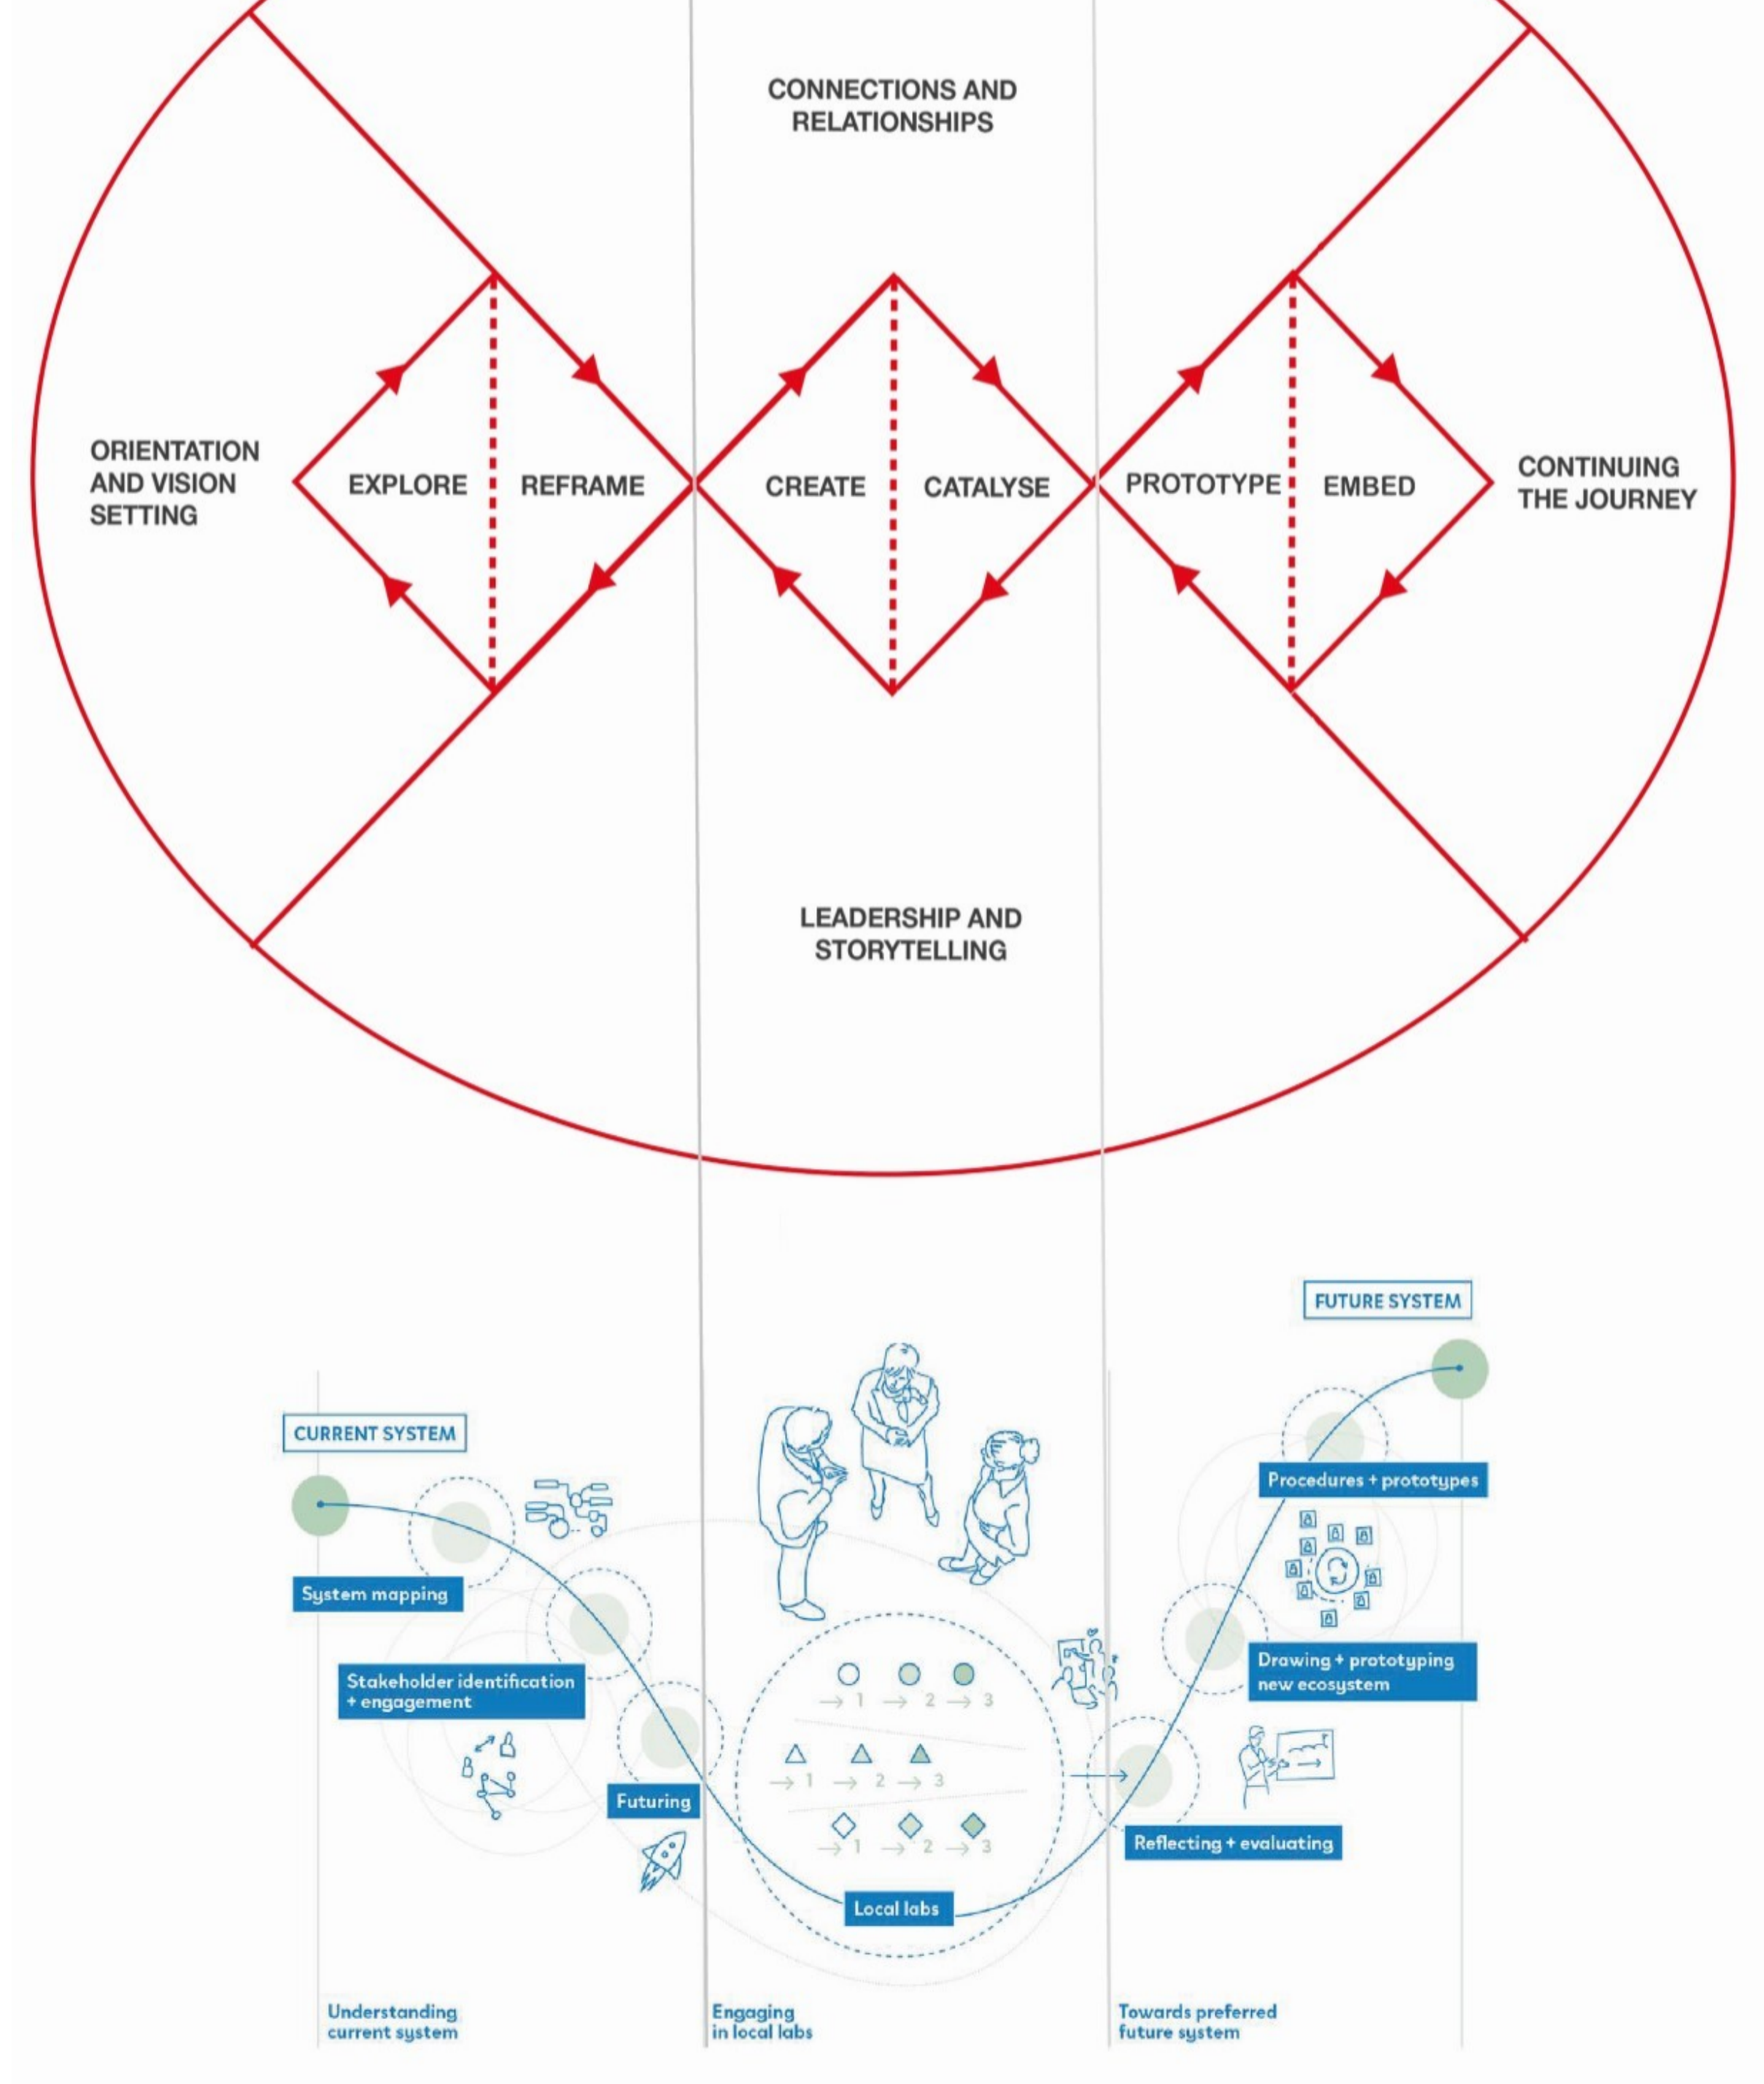

# Beyond Net Zero

A Systemic Design Approach

## Third phase!

# Need for attention on embedding and scaling

# Next steps

- Paper DRS2022 (zooming in on third phase from two cases/contexts)
- Book Innovating with Networks (documenting systemic experiences)
- Research Future Proof Labs (comparing with experiences in other context beyond retail)
- Sprong Systemic Co-Design (collaboration across 4 universities on systemic change during 8 years)
- Already finished:
  - Innovating with Labs (book out, via Lulu)
  - Follow up projects initiated: Next Fashion Retail, PPS local Labs, Future Proof Labs, Circular Retail, etc.)

# Questions from us for you

- Other experiences with third phase?
- Which concepts from System Dynamics are helpful?
- "Balancing" local and systemic levels?
- “Rippling” versus disrupting systems?
- Long lasting effects on systemic change?
- Comparing similar large scale projects in the future in other contexts?
- Analysis across similar cases at next conference?

# Feel free to contact us!
